“Where can be found”

URANUS ORBITS will help

What will happen to URANUS?

ECLIPTIC PLANE TOP VIEW

The difference between the approximate orbit (predicted in 2014) and the real one. This explains URANUS crash time schedule difference

SECOND SUN COMPUTED REAL ORBIT

On December 2016 the 2 forces (Sun and S.S.) will SUM together and start to pull URANO out of its ORBIT

THIS IS THE TOP VIEW

SECOND SUN COMPUTED REAL ORBIT

We need to fit it into a REAL SKY

For this purpose we will use the URANUS ORBIT in the sky
and the ECLIPTIC PLANE.

Working on it still keeps a small approximation due to SW
and graphical inserts

First we need to find the Second Sun positioning towards
Uranus Orbit as understood from CROP CIRCLES.

Many of you already knows that some Universities are saying that the
approximate S.S.orbit (they call it **PLANET 9**) is 250 A.U.

Maybe they seen our videos, and try to make it work a bit on
their side as they are stating an idiot very small mass

As we know CROPS say **261,05 A.U. = 4217,8 years**
MASS 0,666 our SUN

they call it **PLANET 9**

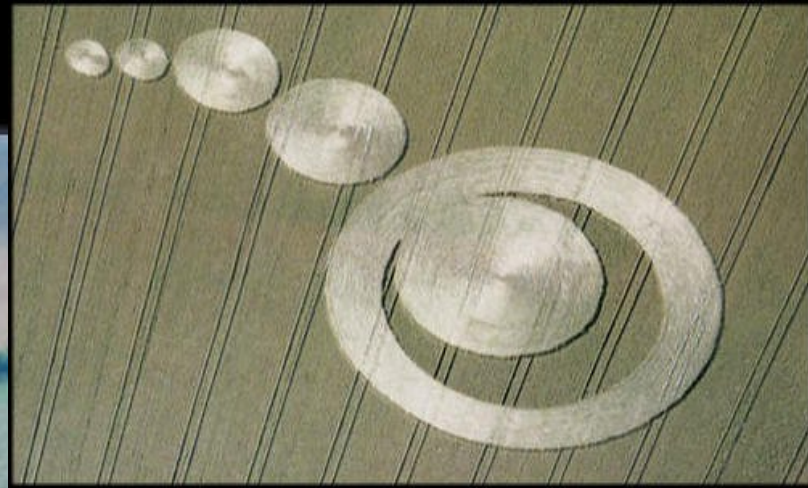

- If they don't know the positioning
- They don't know the distance
- They presume it as small mass as **ONLY 10 times the Earth !!!!** ($5,9726 \times 10^{24} \text{ kg} \times 10 = 5,9726 \times 10^{25} \text{ kg}$)
- **Not even big as JUPITER!!!** $1,8986 \times 10^{27} \text{ kg}$ (mass one thousand times bigger than Earth)

HOW it is that this “**BIG HUGE OBJECT**” has already tilted 6° **ALL** the Solar **SYSTEM**?

We know that the tilt is more than that.. Around $8,5^\circ$

And also the name is **WRONG**: it is **NOT** a **PLANET**, but a complete **SOLAR SYSTEM COMING**

Let's start from the beginning from where it was this **S.S.** in **mid August 2013** at a distance of **less than 46 A.U.** and let's make few calculation in respect to **Uranus orbit** since that time

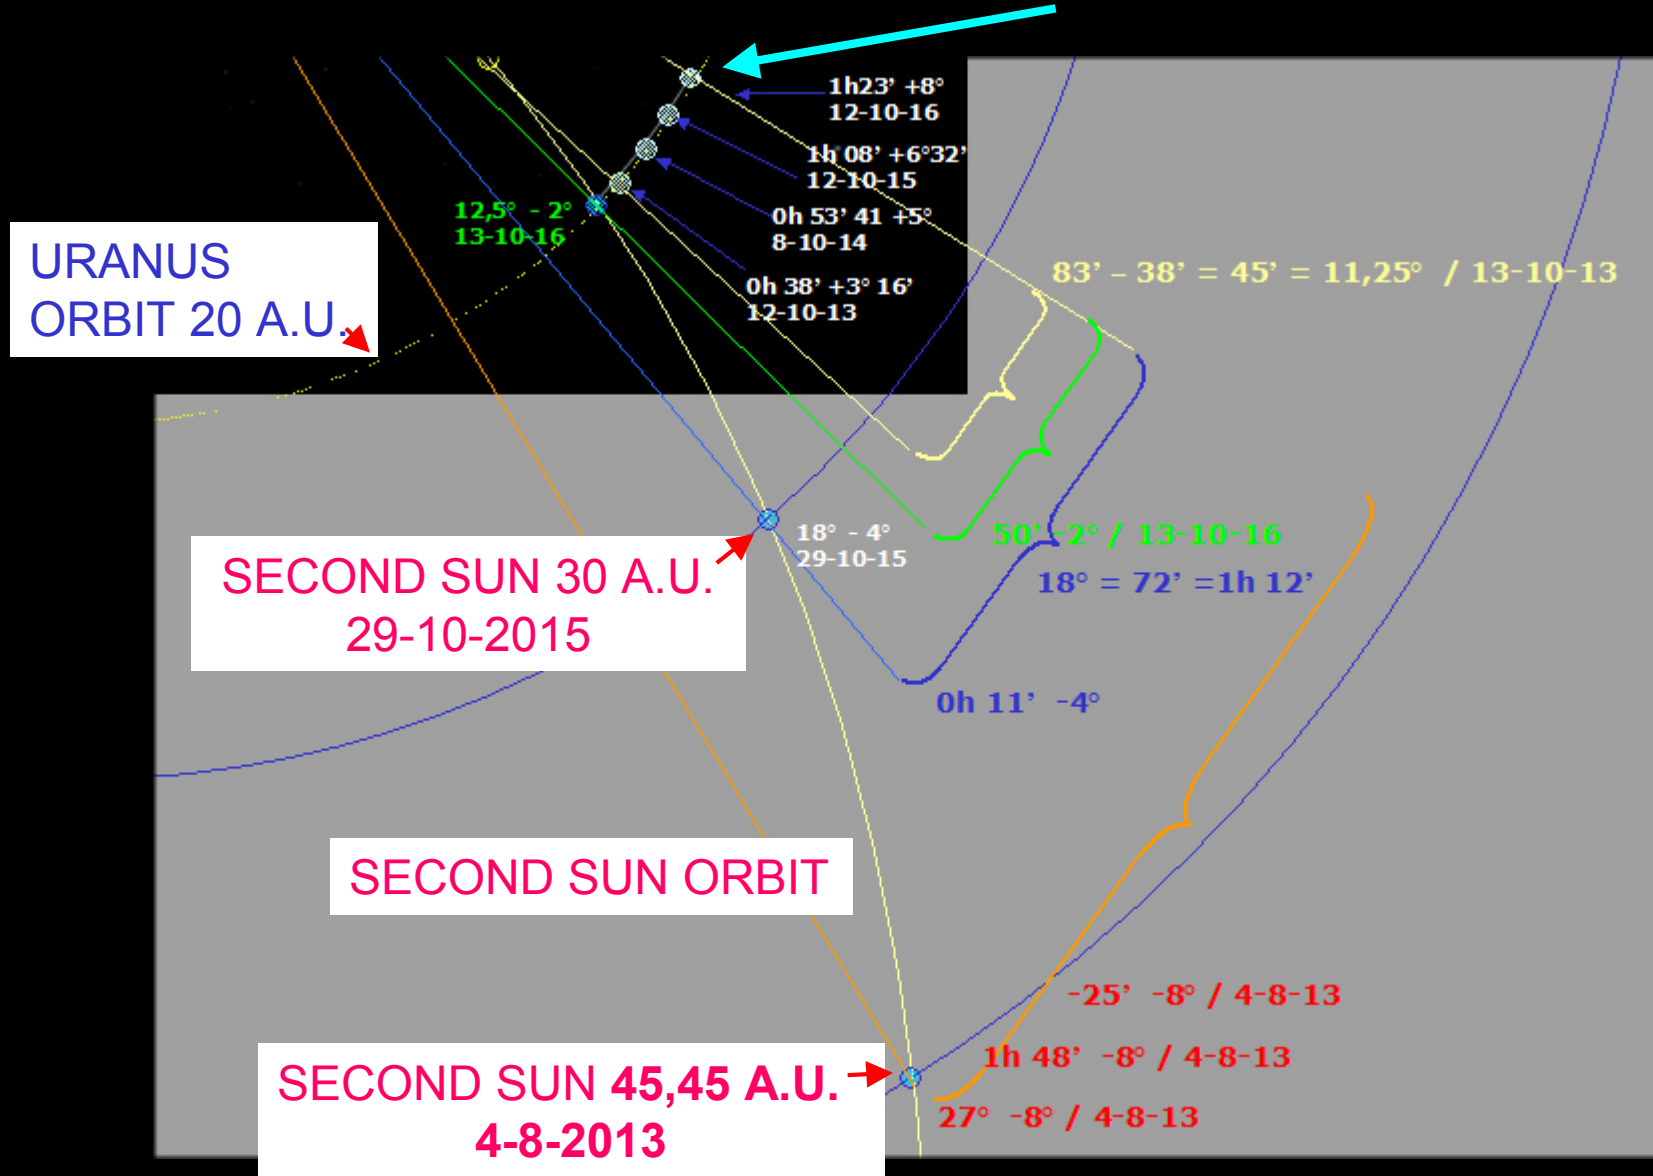

**ONE Second Sun Planet
missing and crashed to Uranus**

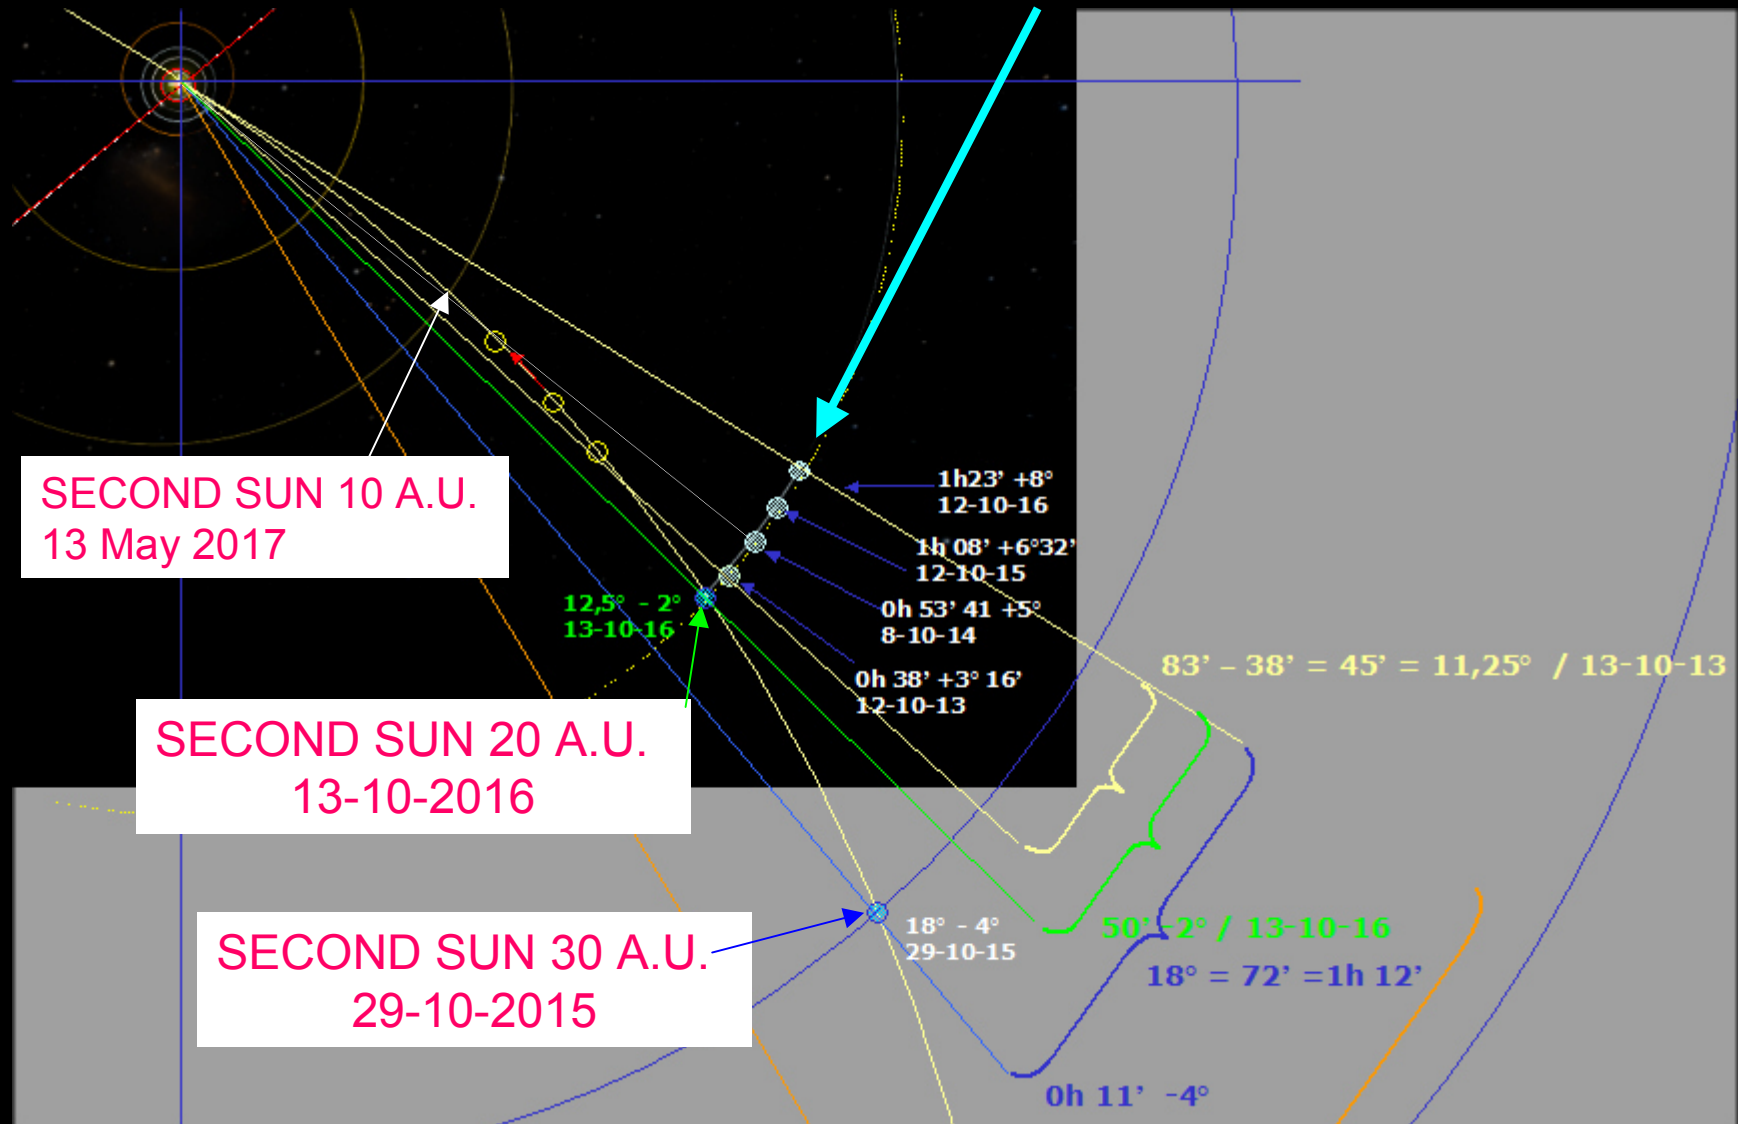

**The 5 main Uranus satellites got:

SECOND SUN COMPUTED REAL ORBIT

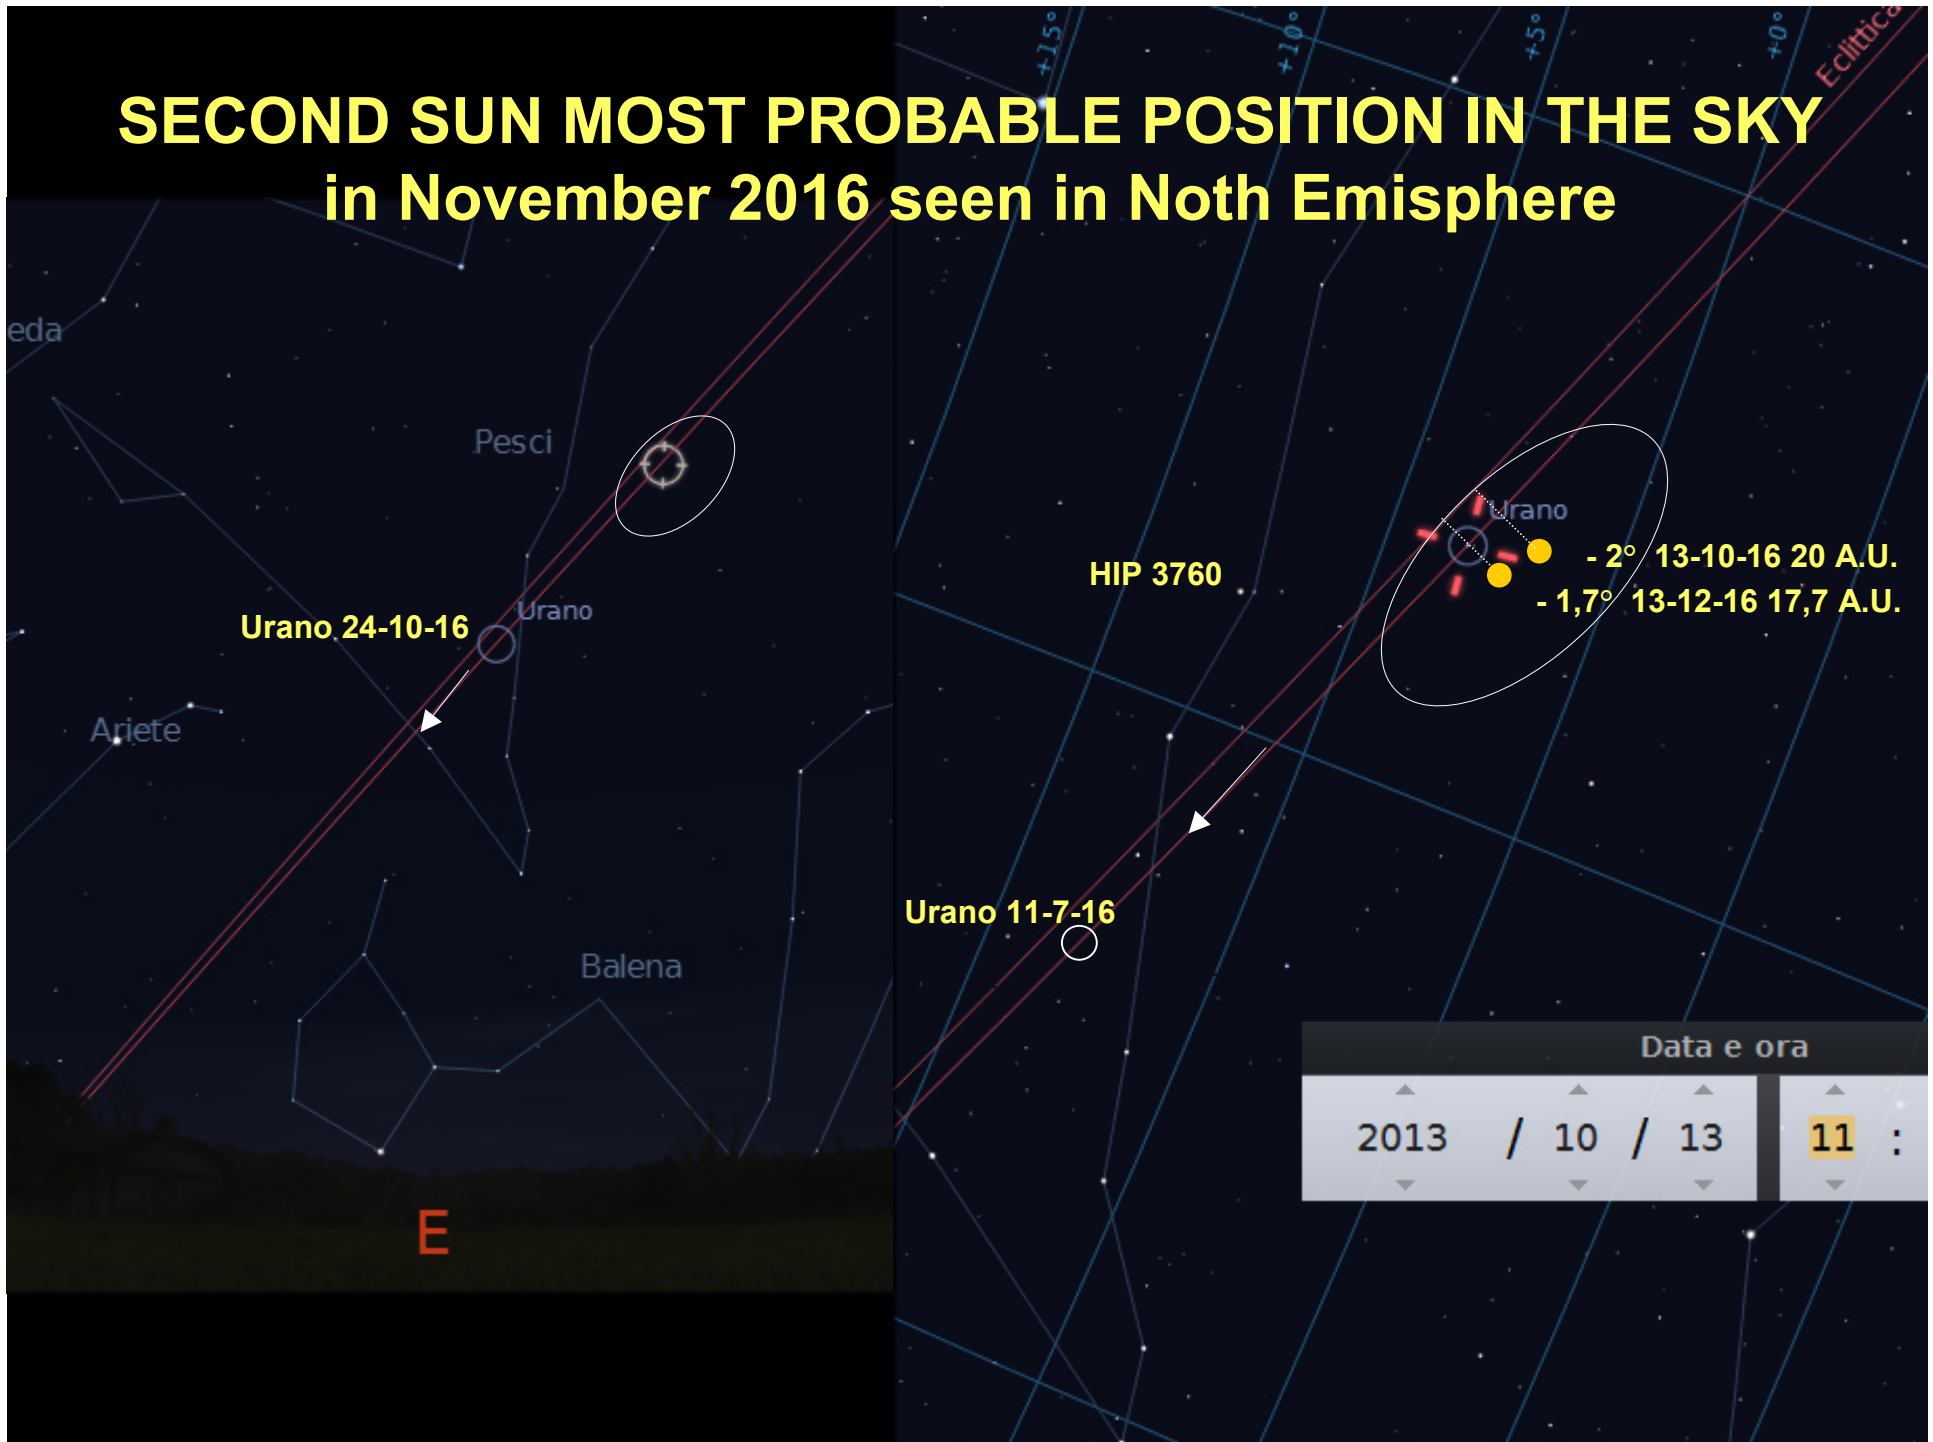

The two orbits follow different ways, so, at a certain time in the real sky we will see the S.S. STEADY on a SPOT, no more moving, because it is coming towards and forward the SUN

URANUS TIME VIEW

It can be seen only at night, so in the periods where his position is on the BACK of the Earth. Either this is on north or south Emisphere. This limits a lot the furure view

URANOs TIME VIEW

VISIBLE up to End December (if ever in some places) then never more up to August 2017 if the Earth position would remain in the NORMAL REVOLUTION ORBIT rotation

BUT we know this will not, so we hope to be able to see in March or April if it will be still there or not

Before I think it will be impossible

In that period Only thru orbital telescopes

NORCIA EARTHQUAKE 6.5 - 30-10-2016

The Ancient XII^o century Catholic Basilic crashed down. If you “social/communists” use churches to get turists to increase your shop income and increase economy making big offence instead of pray and give praises to God the Father, He will crash them down

Revelation 18, 10 They will keep their distance for fear of the torment inflicted on her, and they will say: "Alas, alas, great city, Babylon, mighty city. In one hour your judgment has come. **11** The merchants of the earth will weep and mourn for her, because there will be no more markets for their cargo: **15** The merchants who deal in these goods, who grew rich from her, will keep their distance for fear of the torment inflicted on her. Weeping and mourning,

The Ancient XII° century Catholic Basilic crashed down 30-10-16

Isn't a bit too late to bend on your knees and pray? Only few there had understood who is the CREATOR? all the other 28 thousands has been displaced? Of course nothing compared to 260 thousands deaths in Haiti on 2010 earthquake and another 1000 on the last Mattew 2016 Hurricane. Consacrating to evil there had cost a lot, and the Divine justice use the correct balance. But, this behaviour is NO WORTH. If you save your body, but lose your soul in the Eternal damnation, who to you will be thank for?

**The Holy Virgin Mary asked the conversion of humanity since 1848
