

BECKYs Black SUN - NIGHTtime

NO FILTER - 26-6-2017

The BROWN STAR told by the Holy Virgin Mary is here
All the data computed to the 21st July 2017 were correct.
Here it is at ONLY 85 mil Km distance, less than 1 A.U.
Its nearness has caused the first SUN explosion on 23rd July

Let us see the next path and the happenings

Rev. 10 date 28-11-2017 – CROPs, revolution details and Earth TILT

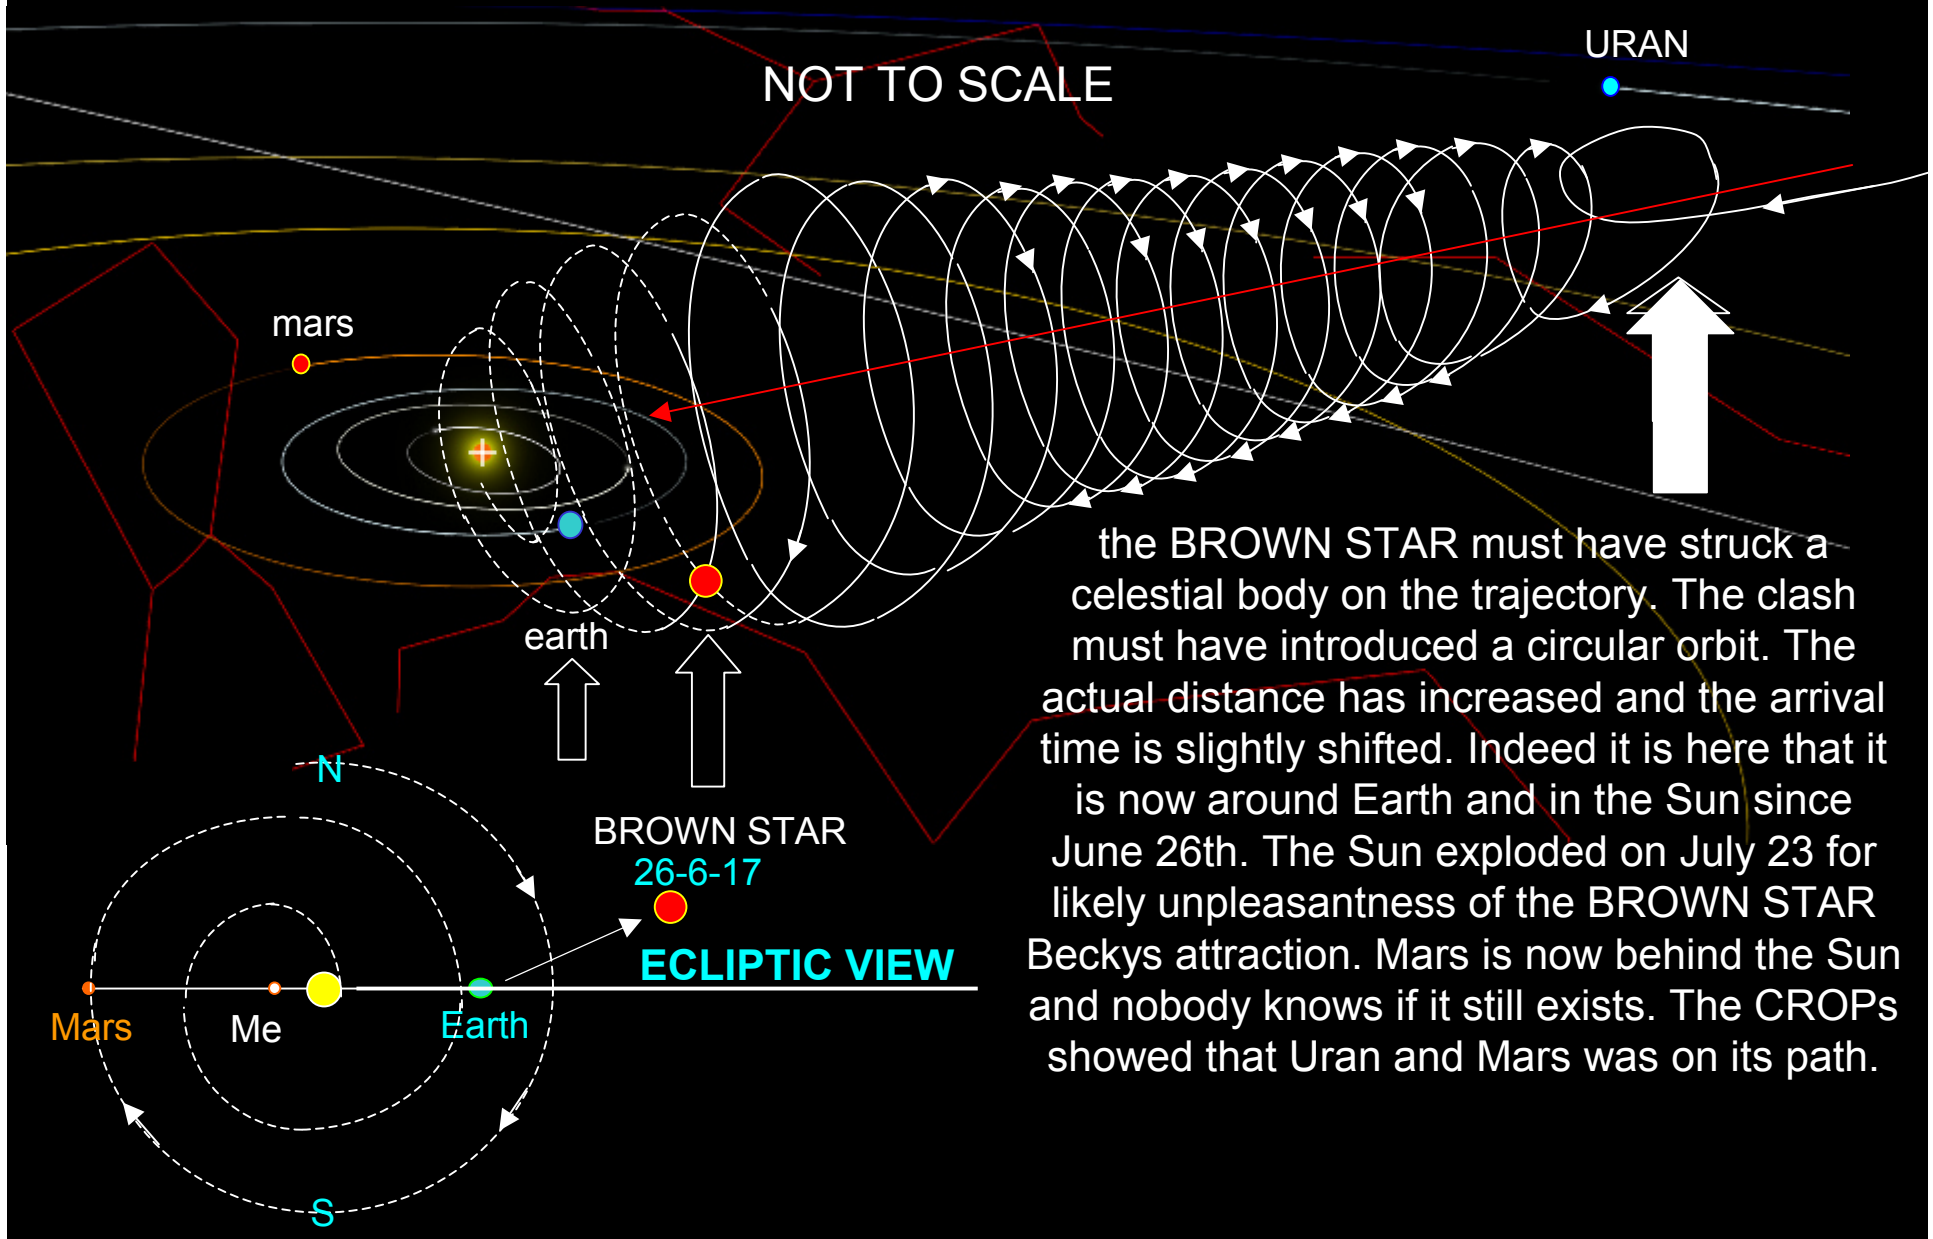

BROWN STAR path: **the movements**

All this accomplish all the infos we have since April from Argentina views and videos and now from the Heaven thru the Bishop.

The Beckys Shot/videos on 26-6-2017 tells also the actual position. The previous 23rd July Sun explosions maybe due to the high attraction Beckys Brown Star to the SUN when reached a certain position. A new explosion is expected on the next lap. If this will happen during 10th to 13th August it means that the revolution now is less than ONE MONTH

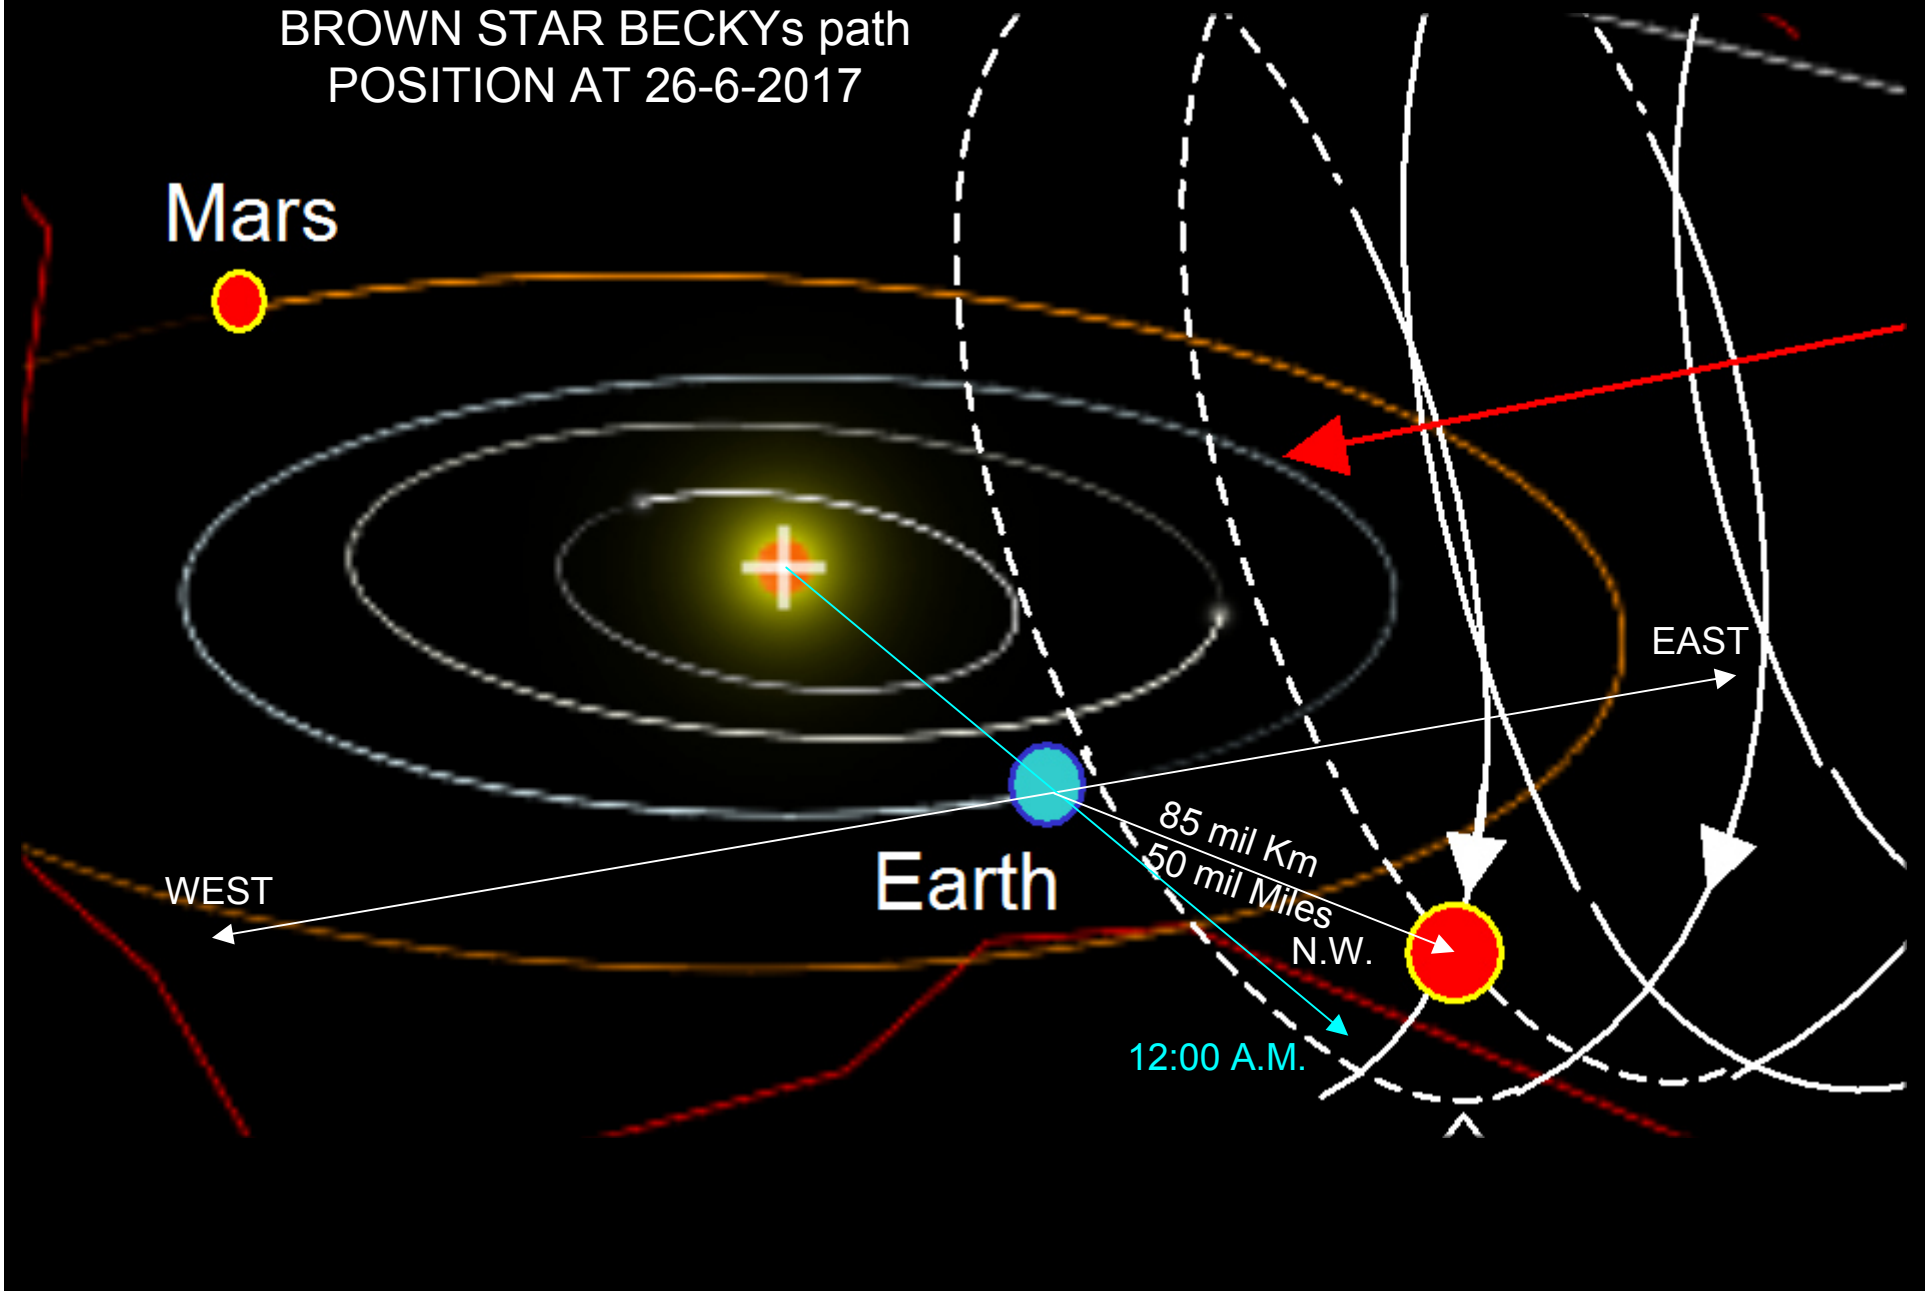

BROWN STAR past path – tridimensional view

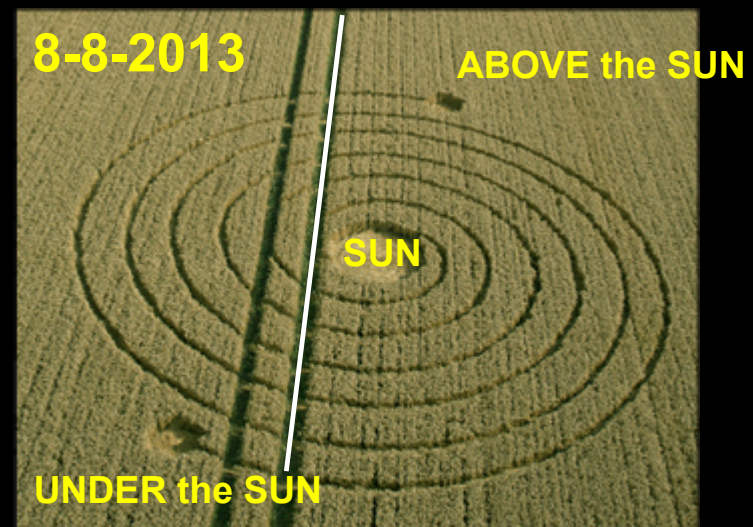

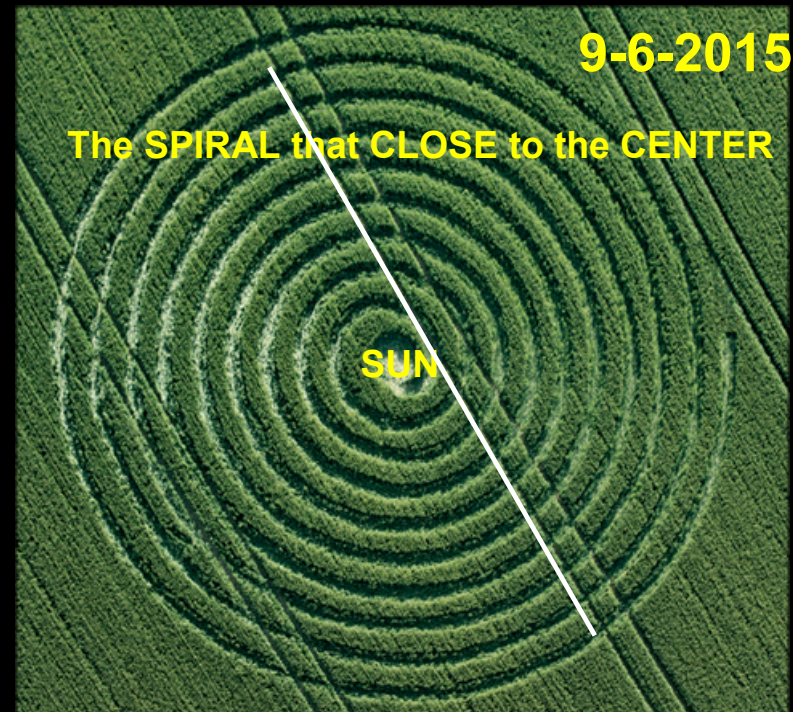

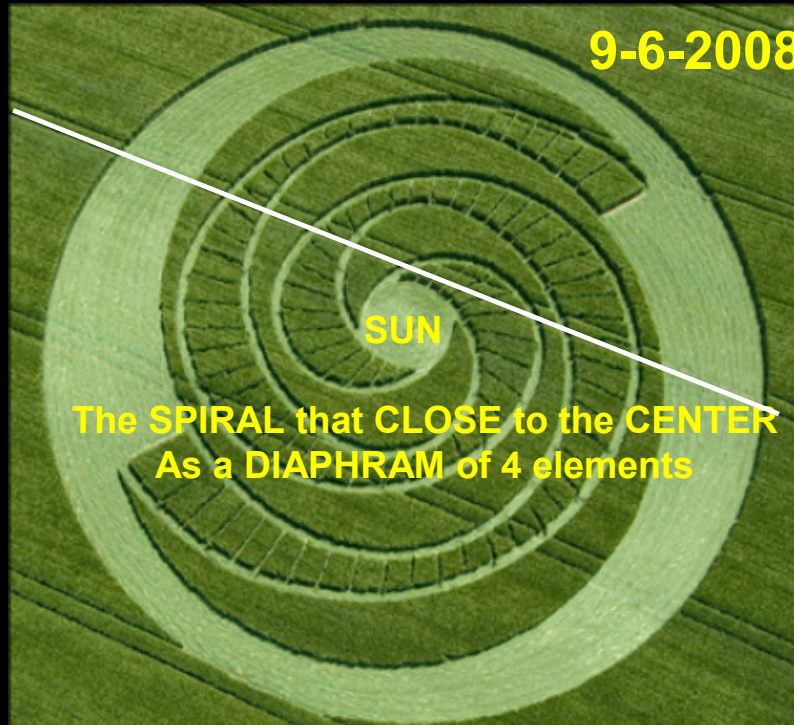

the BROWN STAR must have struck a celestial body on the trajectory. The clash must have introduced a circular orbit. The actual distance has increased and the arrival time is slightly shifted. Indeed it is here that it is now around Earth and in the Sun since June 26th. The Sun exploded on July 23 for likely unpleasantness of the BROWN STAR Beckys attraction. Mars is now behind the Sun and nobody knows if it still exists. The CROPS showed that Uran and Mars was on its path.

BROWN STAR BECKYs path
POSITION AT 26-6-2017

Several CROPS indicates the SPIRAL ORBIT towards a CENTER: the SUN. WHITE LINE: ECLIPTIC PLANE

Giving reference also to other celestial bodies

Brown star

Anguera Messages: There will be an imbalance in the Earth's gravitational pull , which will attract the giant that is far away. 2.807 - 06.03.2007

It will come making a great shadow on the Earth and many men will die of terror to view it 2.493 - 10.03.2005

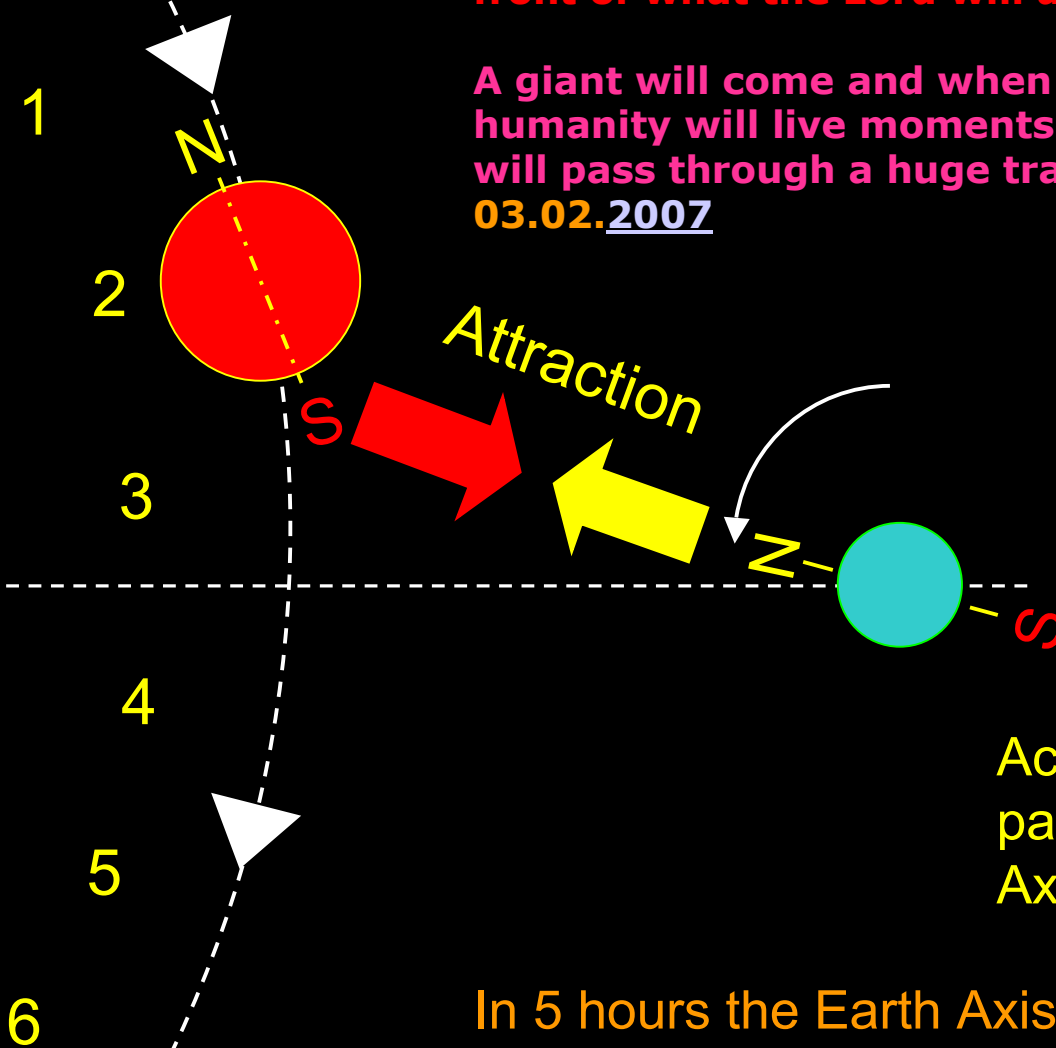

Earth Axis TILT During BROWN STAR passage

Earth Axis +4° (near to EQUINOXE) will start to rotate attracted by the magnetic field of the brown star- Everything will start during night

Anguera Messages: The earth will tilt when the great approaches. The time will be lost. The men will blend in front of what the Lord will allow 2.832 - 03/05/2007

A giant will come and when men announce its proximity, humanity will live moments of great difficulty. The Earth will pass through a huge transformation 2.794 - 03.02.2007

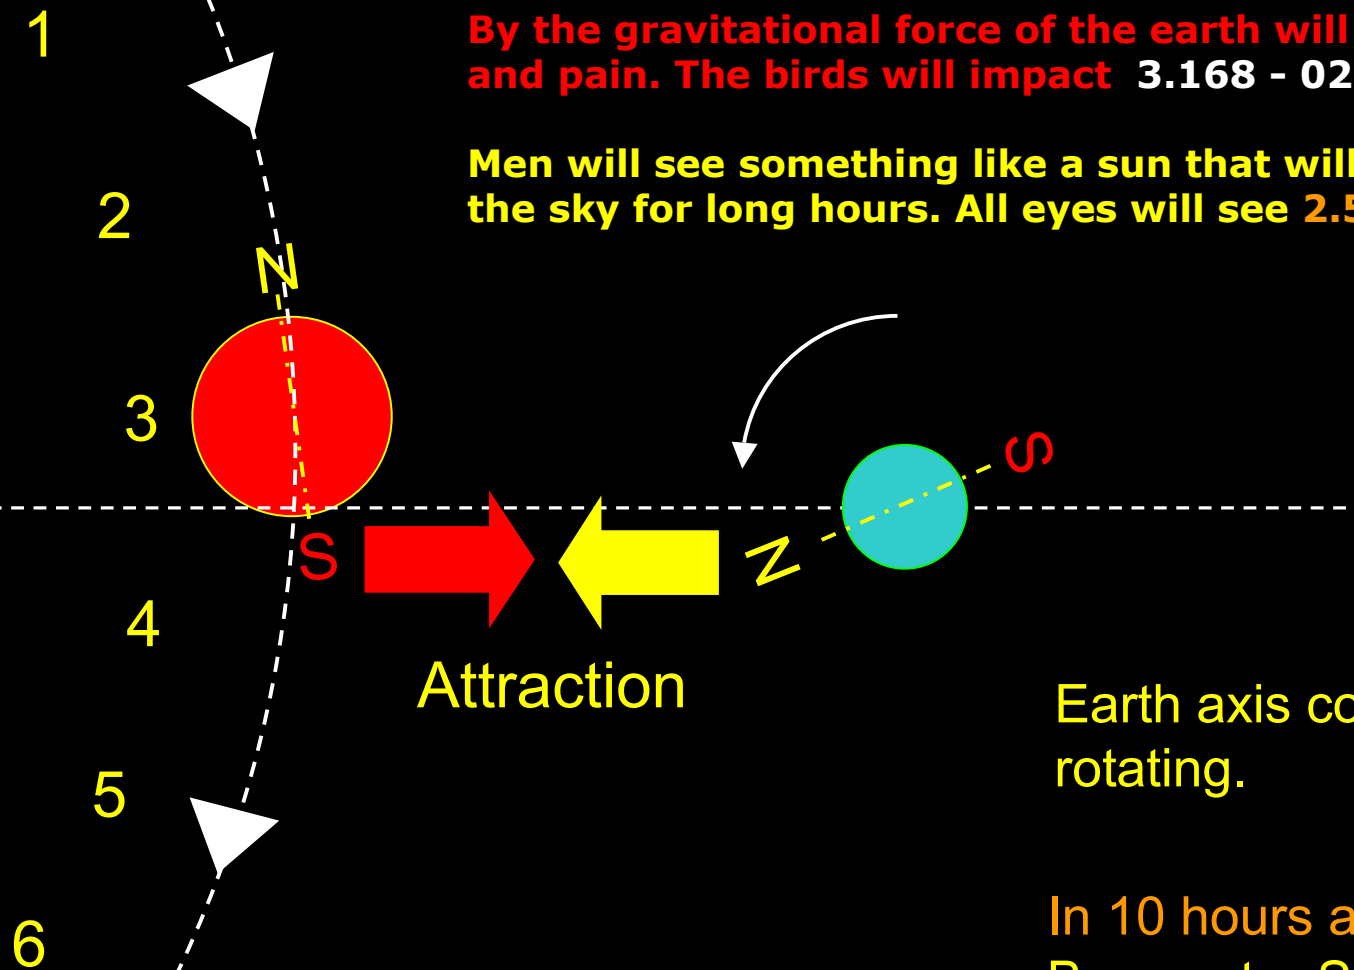

Acceleration imprinted due to passage will give high spin so Axis tilt will be INCREASING

In 5 hours the Earth Axis will bend of about 52° . The Brown star SOUTH POLE will bend only a bit due to brown star big mass not much influenced by Earth small mass.

Anguera Messages: There will be a great inclination in the axis of the ecliptic, which will impact the lives of humans and animals. **2.707 - 15/07/2006**

By the gravitational force of the earth will be great suffering and pain. The birds will impact **3.168 - 02/06/2009**

Men will see something like a sun that will remain visible in the sky for long hours. All eyes will see **2.510 - 16.04.2005**

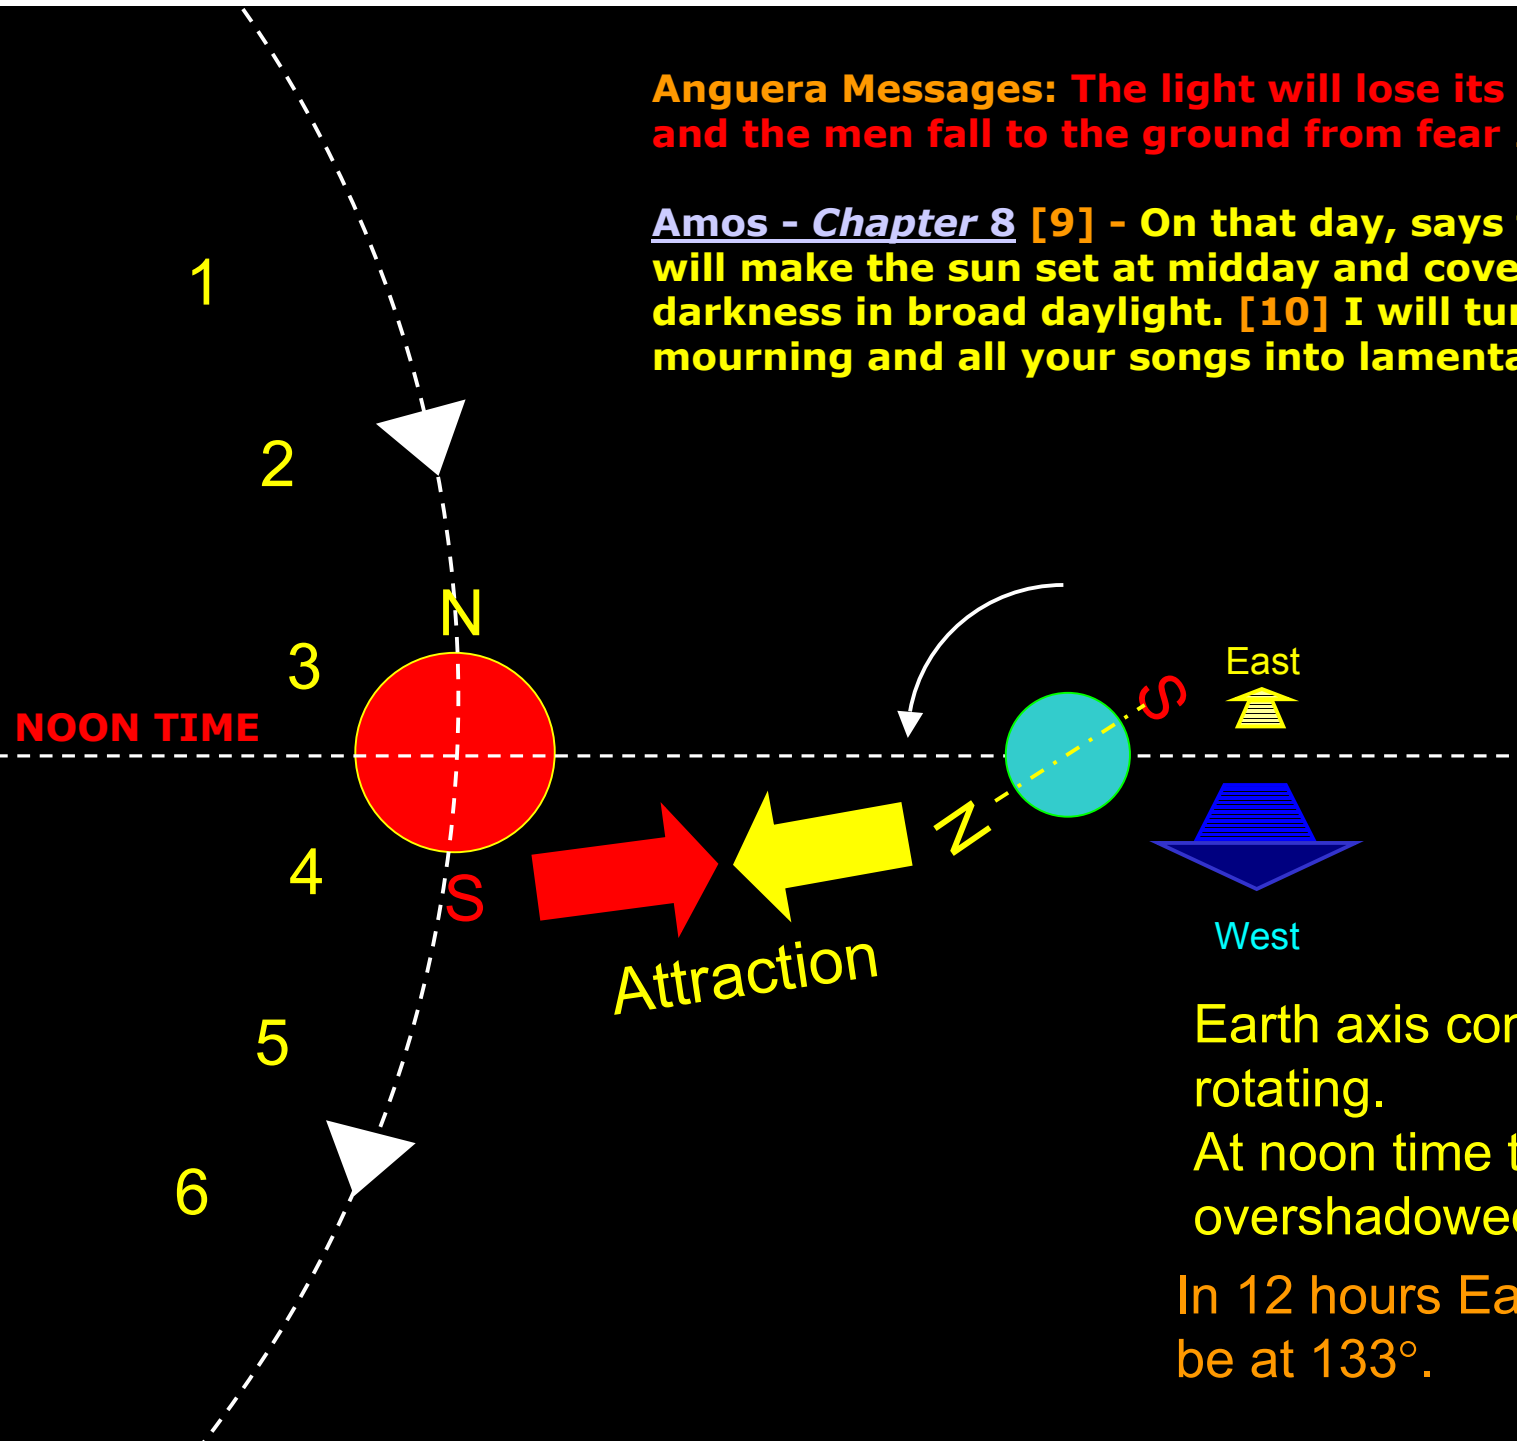

Earth axis continue in rotating.

In 10 hours about 105° . The Brown star SOUTH POLE will bend only a bit due to his big mass

Anguera Messages: The light will lose its glory at high noon and the men fall to the ground from fear 2.471 - 18.01.2005

Amos - Chapter 8 [9] - On that day, says the Lord GOD, I will make the sun set at midday and cover the earth with darkness in broad daylight. [10] I will turn your feasts into mourning and all your songs into lamentations.

Earth axis continue in rotating.
At noon time the SUN will be overshadowed
In 12 hours Earth Axis will be at 133°.

Anguera Messages: The earth will lose its equilibrium and frightening phenomena will occur . **3.297 - 23 marzo 2010**

Whole nations will disappear and humanity will drink the bitter cup of sorrow 3.287 - 2 marzo 2010

reject

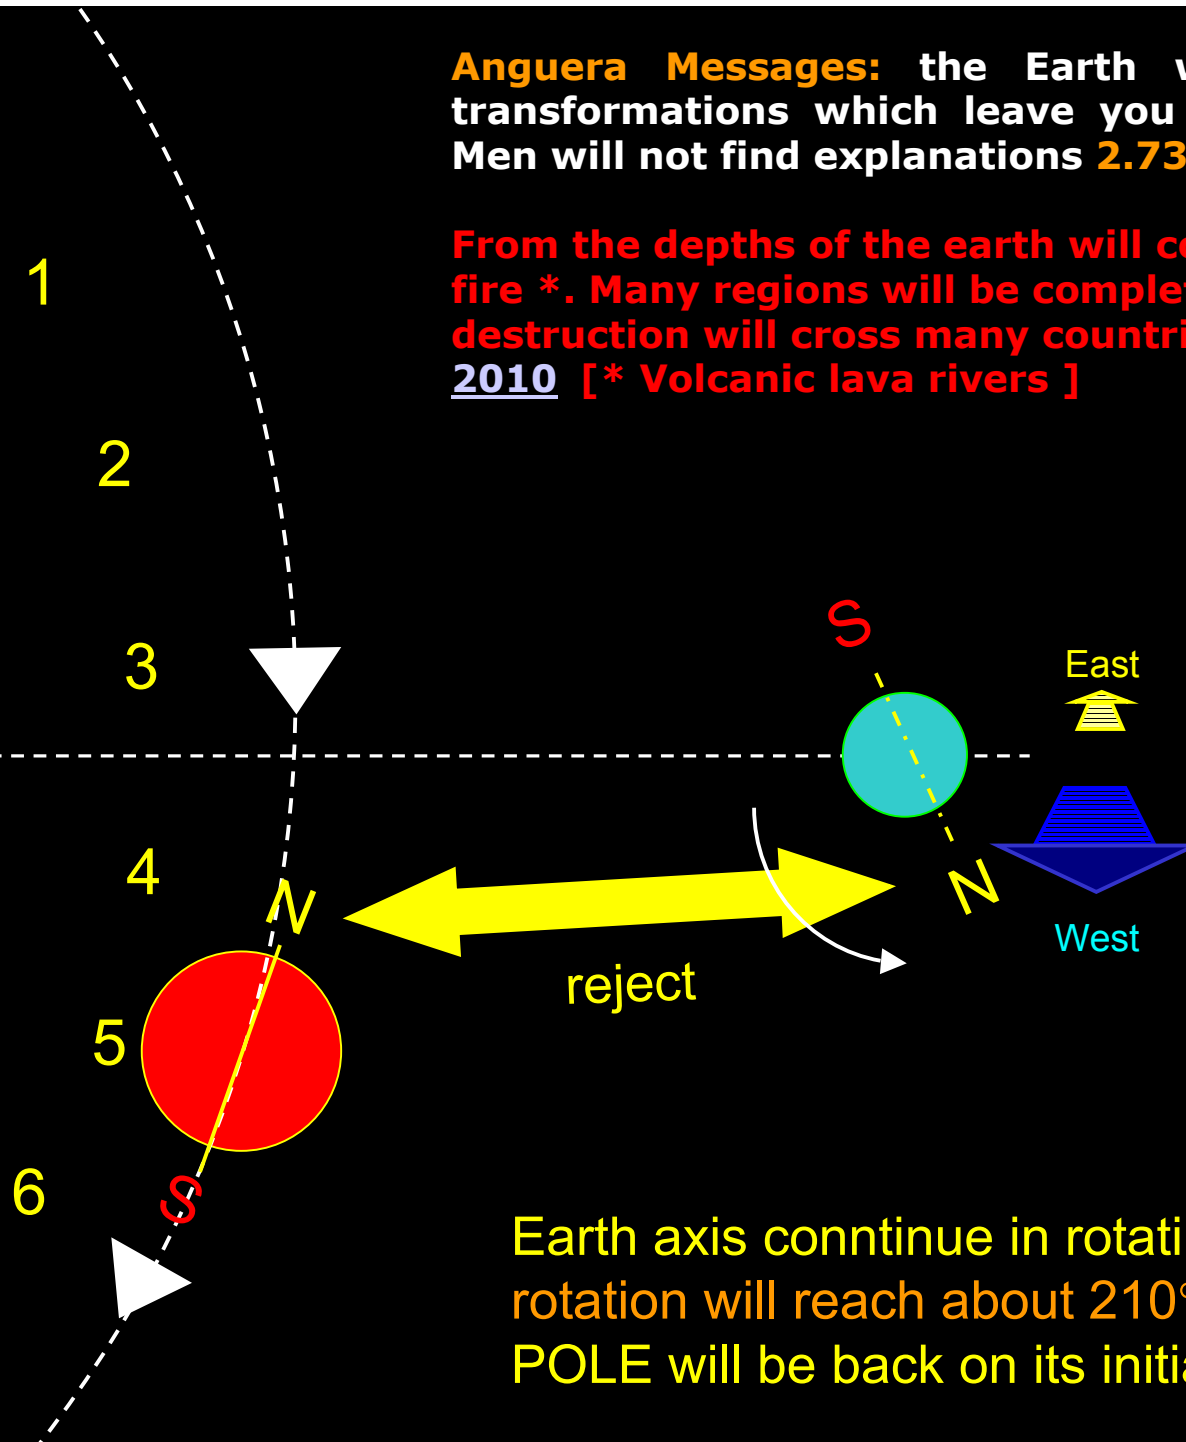

Here the Brown Star North Pole is again presented. This will reject now the Earth NORTH POLE more and more. So Earth axis will continue in rotating in the same previous imprinted direction.

In 15 hours time Earth axis will rotate of about 160° . Brown Star north POLE will then bend a bit back counterclockwise returning on its initial position

Anguera Messages: the Earth will pass through great transformations which leave you confused the wise men. Men will not find explanations **2.730 - 08/09/2006**

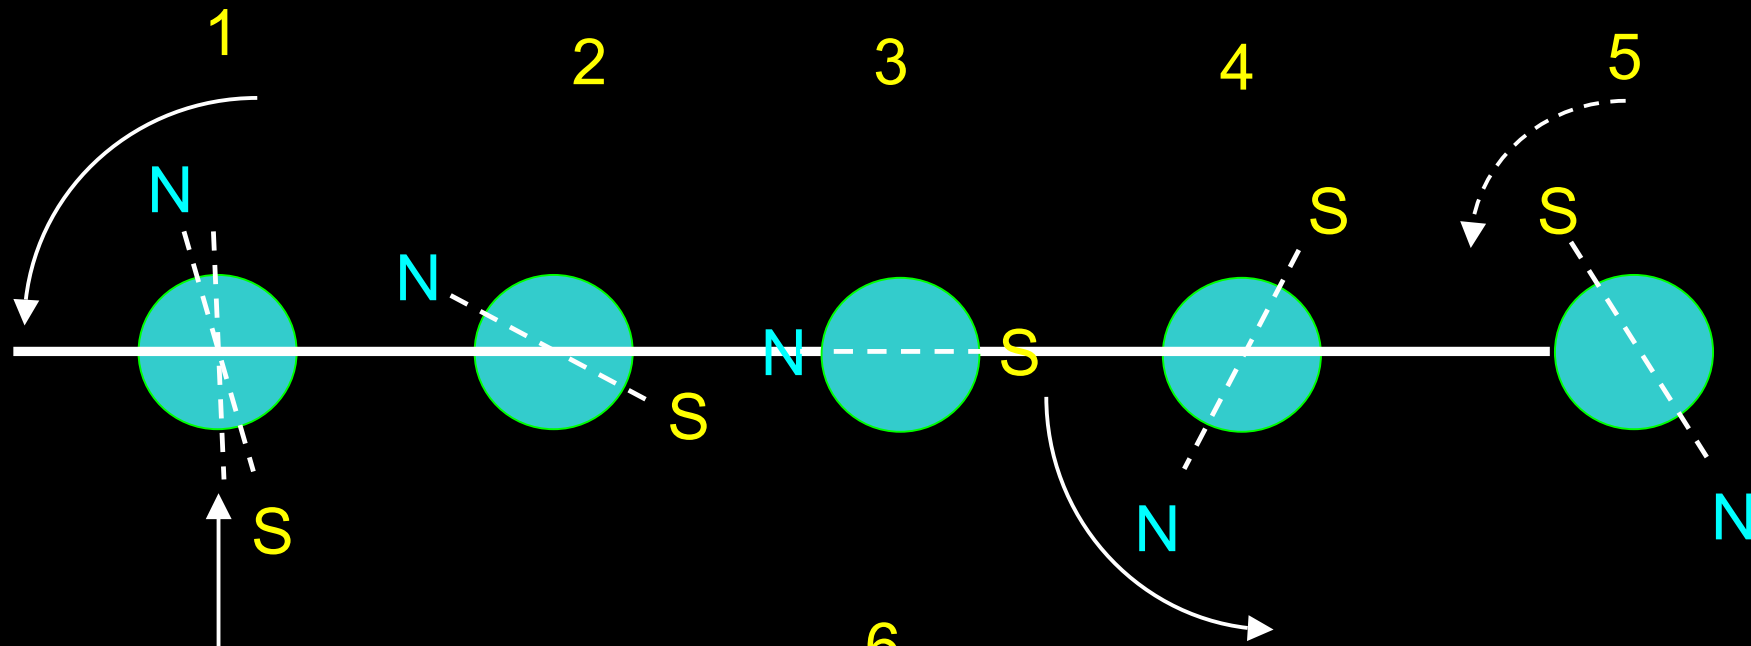

From the depths of the earth will come immense rivers of fire *. Many regions will be completely laid waste and destruction will cross many countries **3.291 - 9 marzo 2010** [* Volcanic lava rivers]

Brown Star North Pole is always present and will reject the Earth NORTH POLE more. So Earth axis will continue in rotating in the same previous direction.

Earth axis continue in rotating. In 20 hours time rotation will reach about 210° . Brown Star north POLE will be back on its initial position

Earth Axis TILTING SEQUENCE during BROWN STAR PASSAGE on 13 th SEPT 2017

BROWN STAR passage

SUN

S N

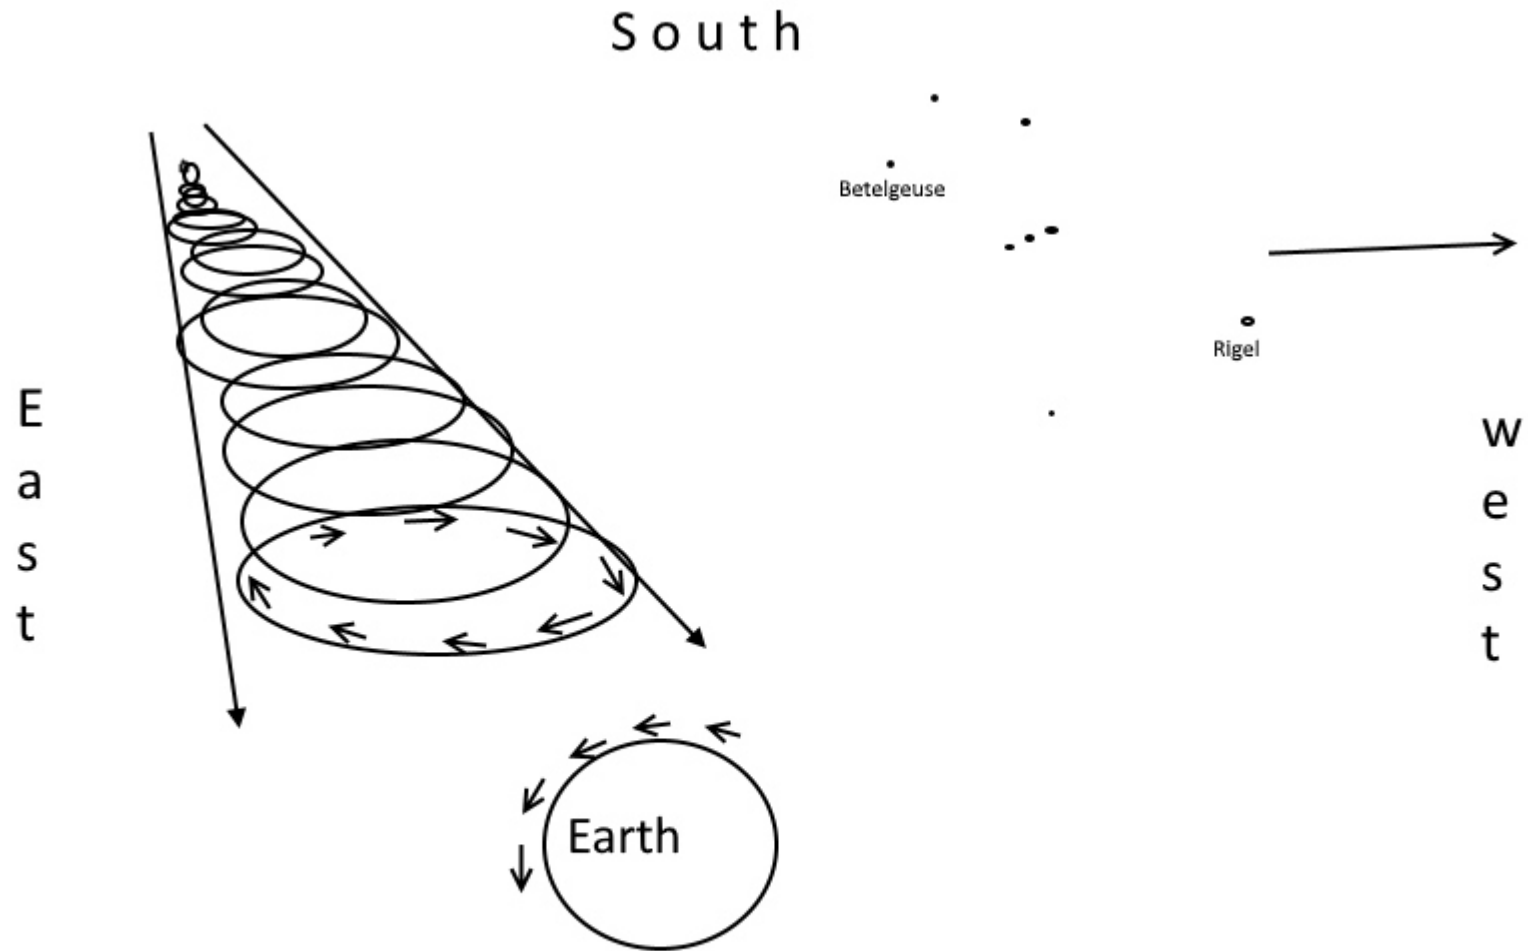

Earth moving towards the Sun
due to double attraction. In
21 days displacement will
reach Venus Orbit – Days will
short down as already
calculated from CROPS

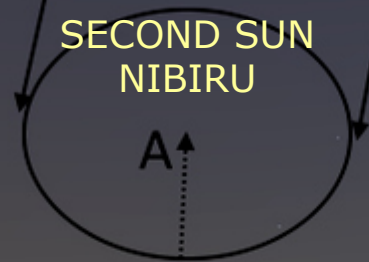

It remains all the rest already seen in April

Whose movements comply to the BECKYs BROWN STAR

SECOND SUN (Nibiru): the movement observed by our astronomer in Argentina since April

SECOND SUN (Nibiru): the movement

30/35° elevación

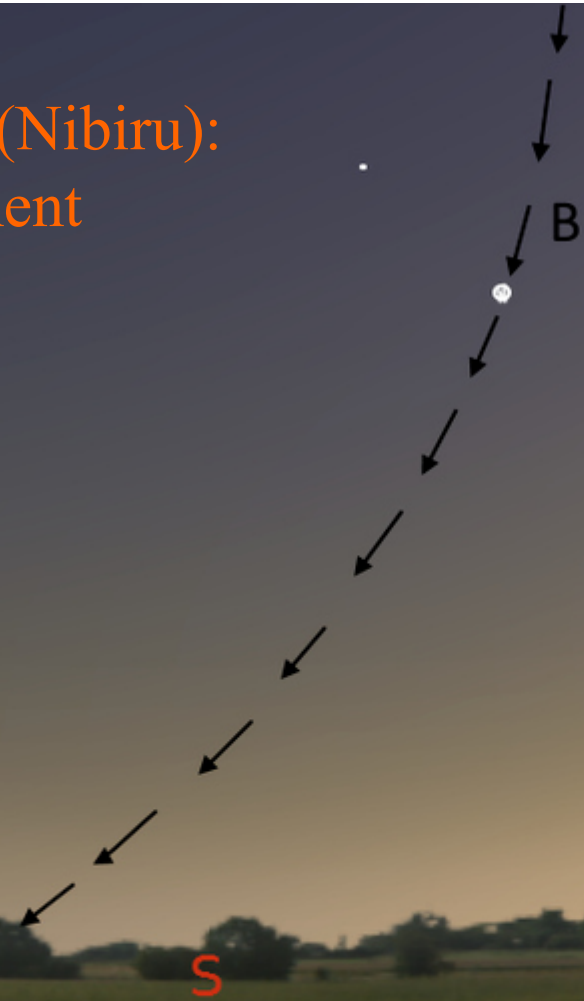

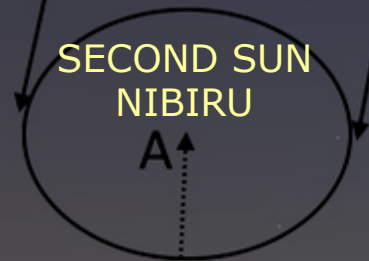

Figure "A" is the region where you should look for what I call the black sun or Nemesis. That is what I take during the day and at full sun with infrared filter or floppy disk of those before. Put the filter between the camera and the telescope, the red color will guide you to the center of the same today more yellow.

SECOND SUN (Nibiru system): the movements

30/35° elevación

Dragon companion

Planet X
few hours
Later the
dragon

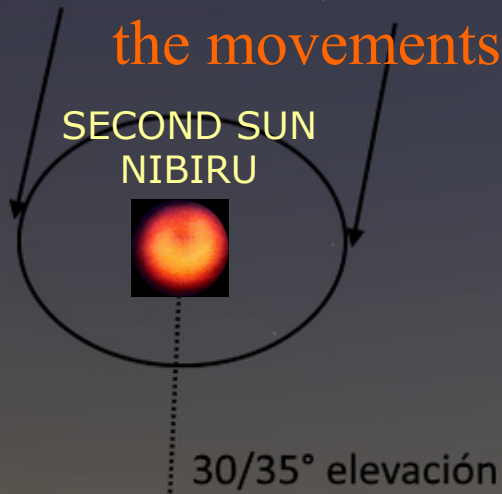

B

Dragon

S

The figure "B" is the Dragon this low in retrogrado to the constellations and march towards the East. It is currently lost under the South horizon. Until a month ago (February) this body did not get lost in the South horizon. The approach has widened the orbit. In our night time the Dragon is currently lost between 24PM and 01AM. The Dragon has a travel companion "fixed", "No orbital". It is positioned in an imaginary clock on the main figure at 11hr. He has never moved from there.

SECOND SUN (Nibiru system): the movements

Dragon companion

B
Dragon

Planet X
few hours
Later the
dragon

S

Planet X

The figure of Planet X detaches itself from the Zenit and descends as the Dragon descends, almost on the same path. Only a few hours later. You can see at 5:30 AM still the figure of Planet X and his satellites at about 20/25 ° elevation above the center of the South.
