

## **"SECOND SUN" DATA**

SECOND SUN Physical & ORBITAL Data

For all the amateur astronomers as we are

With a new proof the happenings are lasting

**"NIBIRU NOW THE REAL TRUTH"**

## SECOND SUN DATA: PHYSICAL DATA

SECOND SUN Total system

$$\text{MASS} = 1,32474 \times 10^{30} \text{ Kg}$$

$$\text{Density} = 1,98 \times 10^3 \text{ Kg/m}^3$$

$$V = m / d$$

$$\text{Volume} = 0,669 \times 10^{27} \text{ m}^3$$

$$r^3 = \frac{3}{4} (V / \Pi) = 0,15972 \times 10^{27}$$

$$\text{Radius} = 0,5426 \times 10^9 \text{ m}$$

$$\text{Diameter} = 1,0852 \times 10^9 \text{ m}$$

$$\text{Diameter Ratio to OUR SUN} = 0,78$$

# SECOND SUN DATA: PHYSICAL DATA

SECOND SUN Total system composition

Second SUN + 4 PLANETS untill Uranos crash

Second SUN + 3 PLANETS + 5 satellites after Uranus  
destruction (after 13 feb 2017)

Names of the acquired 5 satellites :

Miranda - Ariel - Umbriel - Titania - Oberon

## SECOND SUN DATA: ORBITAL DATA

SECOND SUN Total system

Orbit Length = 4217,8 years (from Holy Bible and Crop Circles)

Orbit Length = 261,05 A.U.

Elliptical orbit shape (semiaxis ratio) = 0,66

last Afelio direction = Sagittarius  $\lambda$  Sgr /  $\delta$  Sgr

with Orbital inclination to solar system ecliptic plane =  $33^\circ$   
(before year 2000)

last orbit Perielio focus = OUR SUN (0,33 A.U.)

Entered in the Solar System at 4-8-2013 – distance 45,45 A.U.  
(from Crop Circles)

## The Second SUN seen from Earth

$$r = \arcsin ( SA / SP )$$

SP = distanza Sole-Pianeta **SECOND SUN** – EARTH distance

SA = raggio del Sole **SECOND SUN** radius

$\widehat{APS} = r =$  semidiametro del Sole visto da P

**r = Semidiameter of the SECOND SUN seen from the EARTH**

# SECOND SUN DIMENSIONs in THE SKY

## SECOND SUN PIC TAKEN 25-1-2017

Calculated dimensions – let's see if they real

Camera: Canon EOS 1100 D  
ZOOM: 55 – 250 mm messo a 55 mm  
5 sec exposition - 6400 ISO

The tail movement on the  $\epsilon$  psc  
is due to the initial camera  
movement during shot

On the RED objes this is not  
because the RED take more  
time to excite the CCD pixels.

Other white stars less shining  
do not have snaky tail.

See next pic

THE COMPARISON

The clear proof IS NOW under your eyes

NIBIRU?

PLANET 9?

PLANET 10?

PLANET x?

Holy Virgin Mary in Anguera says:

An extraordinary phenomenon will happen in Europe. The men will not explain it. When men will witness the rise of the great light, just know that it is near the big final battle. Men will call it "second sun".

3199 - 11.8.2009

When the men will see it, they will  
call it "SECOND SUN"

## "SECOND SUN" Conclusions

1 – All the calculated data of mass, density, volume and dimensions is (and was) correct and complies to the DISTANCES computed since April 2014. The S.S. (orbit 4217,8 Years / 261,05 A.U.) 2200 Years before Christ went near by our Solar System producing the DILUVE / Great FLOOD, Pluto orbit tilting and Uranus 90° axis tilting. and this is the TRUTH. Do not be fooled by fake stories. Holy Bible is the "word of God", and if not satisfied, make a research on the past (avoid wikipedia and net infos) and you will find that the GREAT FLOOD is reported also in INCAS, INDIOS, INDIANS, GREEK, MESOPOTAMY & many other cultures ancient "books-graffiti-papirs"

2 – The DISTANCES computed in the time scheduling come from the Excel spreadsheets available on the web (link follows) since time with an accurate step period of 0,02 A.U. beginning in 1985.

3 – The SECOND SUN GRAPHIC calculated ORBIT was correctly understood from ANGELS CROP CIRCLES where from the top view position we resolved and found the real SKY POSITION during its approaching. Here again reported

**COMPUTED DATA FOR S.S. POSITIONING on ECLIPTIC PLANE TOP VIEW – “Hour:min degrees” toward “RA / DEC”**

NASA Launches  
the Infrared  
Astronomical  
Satellite (IRAS)

SECOND SUN  
This was the confused start

**Planet X—Is It Really Out There?**

Scientists have long argued over whether there is the effect of the "missing" planet, or as some have said, "Planet X," in the system of the solar system.

Let's see, the infrared astronomical satellite (IRAS) is going to take an inventory of the solar system and see how many planets there are. It will also see any that have been missed.

"If there is a planet out there, it will be found," says Dr. James Van Allen, director of the Space Science Center at the University of Minnesota. "We are going to find it."

Some astronomers say that the satellite will not be able to find a planet that is smaller than the one we are looking for.

September 10, 1984

# SECOND SUN

This was the confusing start

## Planet X—Is It Really Out There?

Shrouded from the sun's light, mysteriously tugging at the orbits of Uranus and Neptune, is an unseen force that astronomers suspect may be Planet X—a 10th resident of the Earth's celestial neighborhood.

Last year, the infrared astronomical satellite (IRAS), circling in a polar orbit 560 miles from the Earth, detected heat from an object about 50 billion miles away that is now the subject of intense speculation.

"All I can say is that we don't know what it is yet," says Gerry Neugebauer, director of the Palomar Observatory for the California Institute of Technology. Scientists are hopeful that the one-way journeys of the Pioneer 10 and 11 space probes may help to locate the nameless body.

Some astronomers say the heat-emitting object is an unseen collapsed star or possibly a "brown dwarf"—a protostar that never got hot enough to

become a star. However, a growing number of astronomers insist that the object is a dark, gaseous mass that is slowly evolving into a planet.

For decades, astronomers have noted that the orbits of two huge, distant planets—Neptune and Uranus—deviate slightly from what they should be according to the laws of physics. Gravitational pull from Planet X would explain that deviation.

Moreover, says Neugebauer, "if we can show that our own solar system is still creating planets, we'll know that it's happening around other stars, too."

SEPTEMBER 10, 1984

U.S. News & WORLD REPORT

LINEAR

“Unexplained deviations in the orbits of Uranus and Neptune point to a large outer solar system body of 4 to 8 Earth masses on a highly tilted orbit, beyond 7 billion miles from the Sun.”

A.U distance

Km distance

speed  
millionKm/day

Something they got at that time, then many speculations have been made on the subject later on to fold up the new not to scare people. They could not know of course the right distance.. but  
**OUR CALCULATIONS MEETS** the “beyond 7 billions miles” (12.6 billions Km). They where only 2.8 billions miles wrong. Not much of course

1984 'Planet X' Article by U.S. News — Source: NASA

“All I can say is that we don’t know what it is yet,” says Gerry Neugesbeuer, director of the Palomar Observatory for the California Institute of Technology. Scientists are hopeful that the one-way journeys of the Pioneer 10 and 11 space probes may help to locate the nameless body.

## SECOND SUN

This was the confused start

Let's now return to our days.

We still find some people that states that planet x is ONLY 10 times the Earth. Do you imagine a "small rock" 1/10 of Jupiter far as never it could be, tilting the Solar system Ecliptic and engraving its force since 1984?

Now many still speculate on else data stating a roughly orbit length but still do not know where it is. Practically is like solving a 4 degrees equation with w, x, y, z as unknowns, knowing only x.

Many are amateur astronomers of course as we are many others not. Not even simple maths rules are there to be applied correctly. But unfortunately people today are learnt with smartphones and of course all get "smarts while simply stupid". Get out there

## "SECOND SUN" Conclusions

- 4 - ALL the images found on the net/youtube where someone shows pics of S.S. during day are FAKE, and during night are fake also because have no reference to anything
- 5 - the images found on the net/youtube where someone shows pics of S.S. with more than 4 planets are also ALL FAKE

CROP CIRCLES are from Heaven and do not lie. You cannot decide this, even if you do not like it as real truth, believing in:

**"smarts while simply stupid"**

6 – The SECOND SUN PERIELIO FOCUS now is OUR SUN POSITION, where the max speed will be reached on the very last few seconds before the Sun IMPACT and will be at the speed of light, generating a small BLACK HOLE.

The Holy Virgin Mary in Anguera says: the Earth will be covered by darkness. The darkness will be released by the immense light \*. A mystery that exists in the great bright light will be revealed. 2793 - 31.01.2007 [\* the light is OUR SUN]

Here the previous theoretical view of the Ecliptic plane before the tilt

The fire will burn the light\* and there will be a big explosion. 2540 - 25.06.2005

The Second Sun has tilted the ECLIPTIC PLANE of about 8.5° Solar System ECLIPTIC PLANE is ON THE SAME PLANE of the SECOND SUN. This is visible by looking at the SECOND SUN POSITION taken in the 25-1-2017 pic, slightly above the computed position just a bit below the line of ζ psc A and ε psc . All the previous references now are gone, We have to consider it now as on the same level as our solar system

'Planet Nine' Can't Hide Much Longer, Scientists Say  
(space.com Oct. 20.2016)

Also other Universities has said the same in October 2016.

Oh no, no, no..... My dear friends

**SECOND SUN is already here**  
**You can see it, you can smell it and you can taste it**

2000 to 2800 Earthquakes in Italy every 8 days it means  
12 every hours  
**one every 5 minutes**  
NOTHING is Happening?

## Hubble's Slice of Sagittarius Jan. 19, 2017

This stunning image, captured by the NASA/ESA Hubble Space Telescope's Advanced Camera for Surveys (ACS), shows part of the sky in the constellation of Sagittarius (The Archer). The region is rendered in exquisite detail — deep red and bright blue stars are scattered across the frame, set against a background of thousands of more distant stars and galaxies. Two features are particularly striking: the colors of the stars, and the dramatic crosses that burst from the centers of the brightest bodies. ***Image credit:***

***ESA/Hubble & NASA***

***Text credit: European Space Agency***

One thing is sure, satellites won't last long. They will go out of order in few weeks time for earth axis tilting (CROP CIRCLE credit). Using Hubble they are following the S.S. orbit, because they hope it will at least happen as on the Great Flood time, but..... They do not really know the final happening yet, so we can give them a better credit:

The Holy Virgin Mary in Anguera says: The day will come when the earth will be wrapped in thick darkness. The men beg for help and they will not know where to go 3.186 - July 13, 2009

The men will bring within the earth that will be cause for destruction of many regions. 3107 - 10/01/2009

A fire will cause destruction in the land of ice. From the depths it will be great devastation for men. 3.342 - July 8, 2010

Nobody can escape the **wrath of God**. Men know how to escape from each other, but how to escape from the Lord? It is born from injustice, but his end will come from justice. God is always the same. He is Mercy and Justice. 2484 - 17.02.2005

## “SECOND SUN” Conclusions

Of course we know scientists do not know anything about the Second Sun Coming, so they say. So we'll leave them there with their stuff. By the way I can say:

8 – Any stupid assertion denying the Second Sun present PERIELIO focus, means that it hasn't been clearly understood the matter. The Second Sun orbit does not have a revolution toward the same point each time, because it has a SPIRAL ORBIT. See next slide

9 – for amateur astronomer the SECOND SUN ORBIT calculation excel file can be downloaded here:

<http://www.royaldevice.com/1/DATA/SECOND-SUN-ORBIT-DATA-25-5-1985-21-7-2017.xls>

The orbit calculation is divided into 3 spreadsheets and cover the S.S. approaching our SUN starting from 130 A.U. on the 25.5.1985 up to the 21st July 2017 when the CRASH will be

## Second Sun ORBIT – not to scale

4217 years ago the Second Sun + its orbiting planets arrived at a distance not too dangerous to Solar System, but some problems were made as the GREAT FLOOD on Earth, tilting of Plutos orbit, 90° URANUS axis tilting too, then went back, but its orbit is not fixed but slides as shown. Now it will be the LAST TIME

**SCIENTISTS LOOKING AT UNIVERSE HALT - HOLDING ON - STOPPED  
(speed of light is negligible for GOD) GUESS IT HAS BILLION YEARS  
foolishing everything. You too maybe, but do not be fool**

**For better understanding**

**Just take a glass bottle full of “water”**

**Throw it with force to the ground**

**It wil crash everything down in a mess**

**Then go in your garden**

**Take an ant and put it nearby the mess and ask her how much time she  
will be able to make the same, or how much time it took you to make  
that mess. The example gives the idea but is worst than that.**

**With a microbe the example is better, but i do not think you will be able  
to manage it. Now, who is the microbe not understanding a thing?**

Dear children, the earth is full of wickedness and my poor children walk as blind driving blind. You still have long years of hard trials. Come back to Jesus. Those who hear his words will experience great joy. In the Last day will be proclaimed blessed by the Father. What Jesus has reserved for his it has never been seen by human eyes and no man has ever experienced. After all the tribulation, which it will change the whole earth geographically, the **fiat of God** will transform everything and men will live fully happy. Rejoice in the Lord. Don't get away from prayer. The sincere and perfect prayer transforms you and brings you closer to my Son Jesus. Don't go back. Go Forward without fear. This is the message I give you today in the name of the Holy Trinity. Thanks for allowing me to reunite you here once again. I bless you in the name of the Father, the Son and the Holy Spirit. Amen. Be at peace. **3.961 - 1 april 2014**

This file is downloadable at:
