

The BIG PULL

FIRST

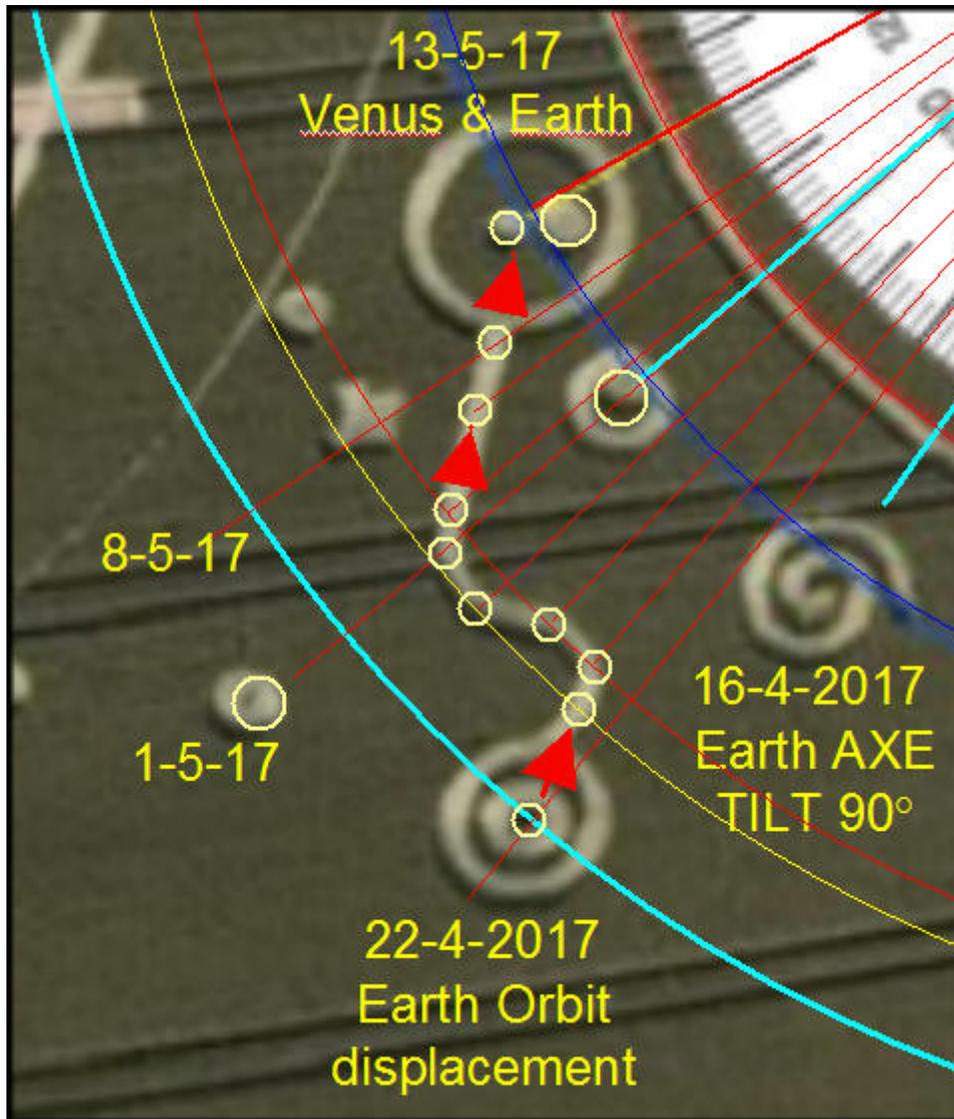

The earth will continue to move from its axis, without mankind's knowledge. The sea will increase in quantity, leaving thousands of submerged cities. Stormy winds ever seen in quiet city, will demolish houses in a second. magnetic storms will bring fear and terror in the big cities. Sleeping volcanoes are going to wake up leaving a trail of destruction. September 10, 2006 [from Ferreira] prophecies Brazil

SECOND

There will be a great obliquity on the ecliptic, which will impact the lives of humans and animals. Anguera message # 2707 - 15/07/2006

FIRST

The earth will continue to move from its axis,
without mankind's knowledge.

SECOND

There will be a great obliquity
on the ecliptic

The **SECOND** we already
know: the TILTING starting
from
16-4-2017 to 22ND April 2017
in six 15° steps/day
Up to 90° degrees due to the
BIG PULL by the Second Sun
starting from 1st April. Earth
Axis will tilt completely then
Earth will displace its orbit

The FIRST

The earth will continue to move from its axis,
without mankind's knowledge.

seems not to be real.... How this can be?

BUT.....

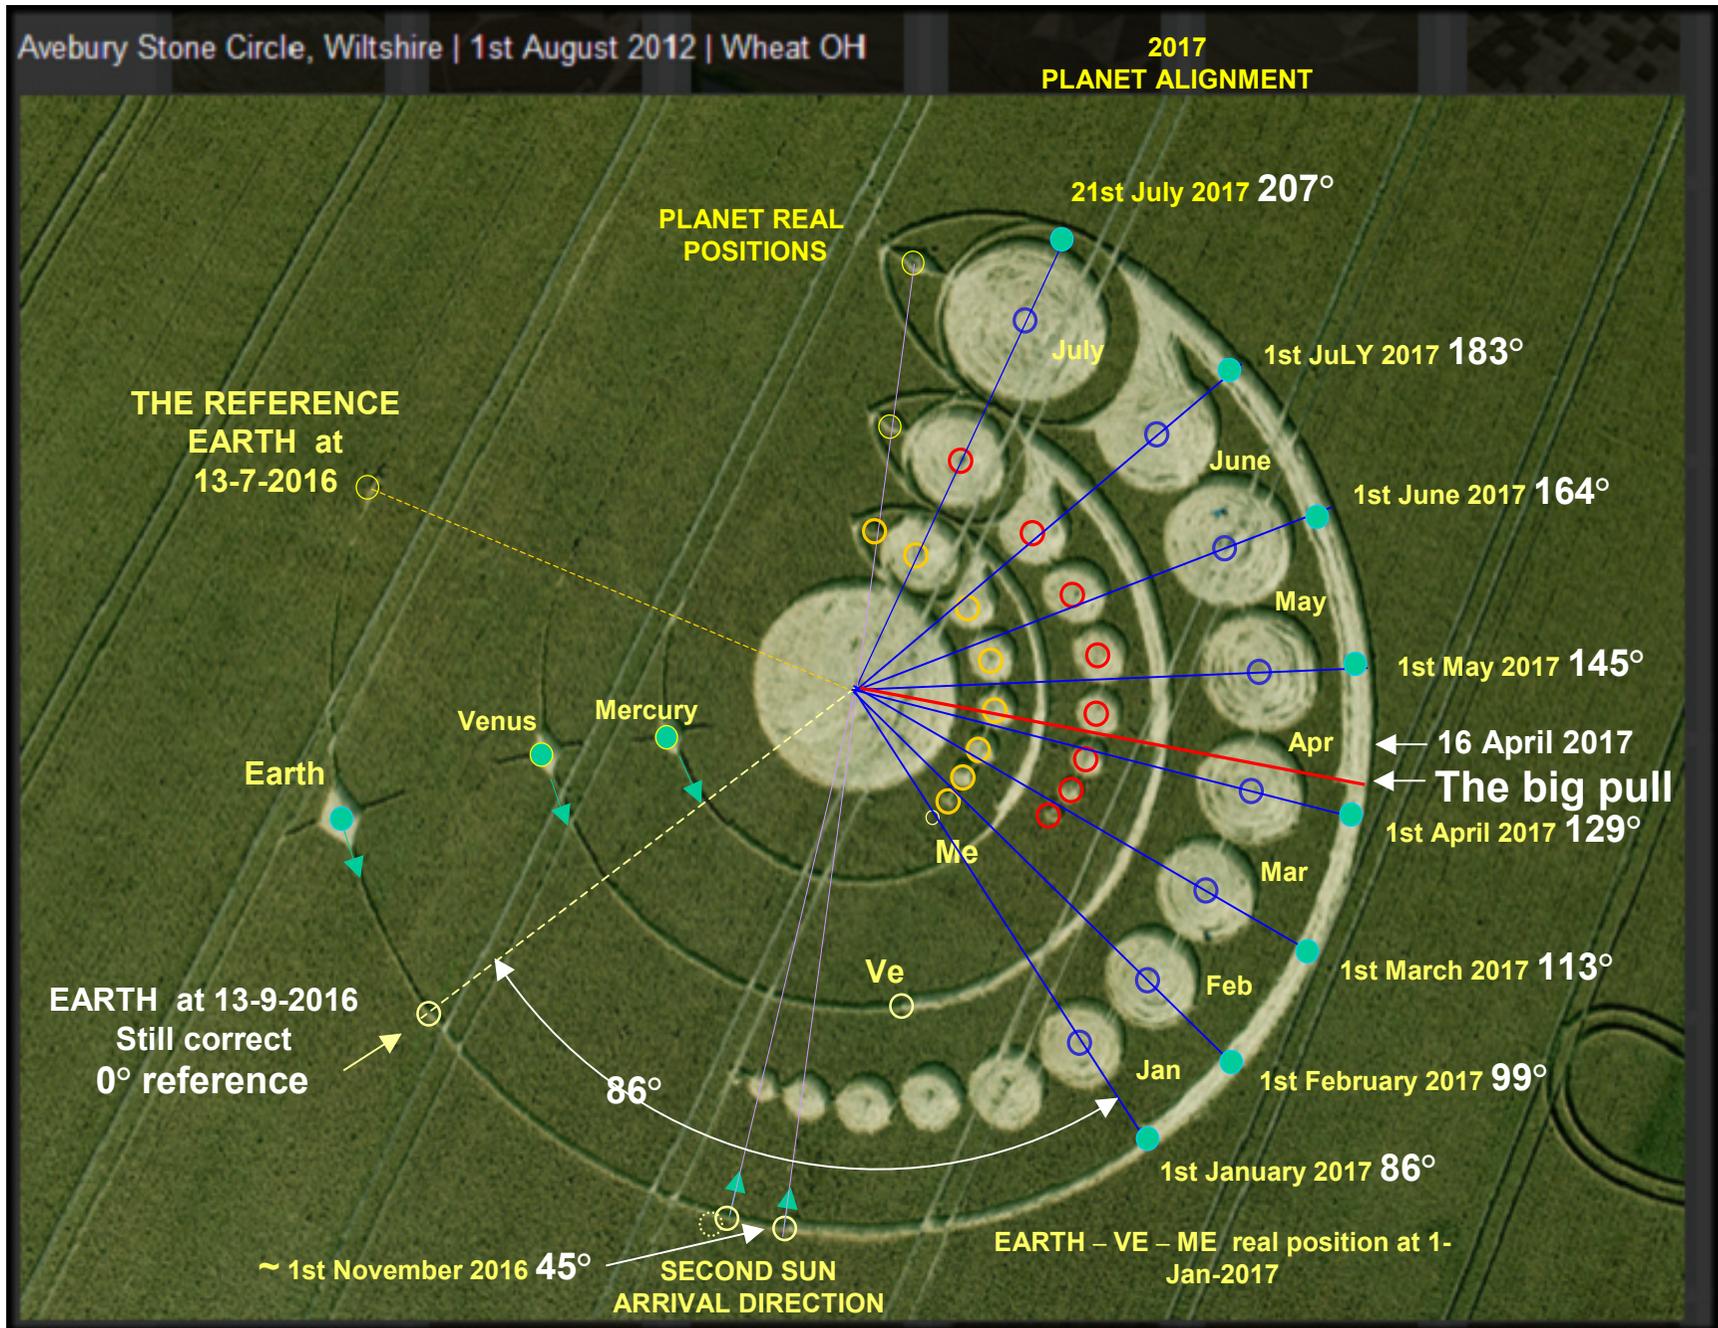

IT IS COMPLETELY TRUE

LET'S SEE WHAT'S ALREADY HAPPENING.

THE REFERENCE NOW IS:

13 SEPTEMBER 2016

13 SEPTEMBER 2016 to 1-1-2017 ONLY 86° REVOLUTION

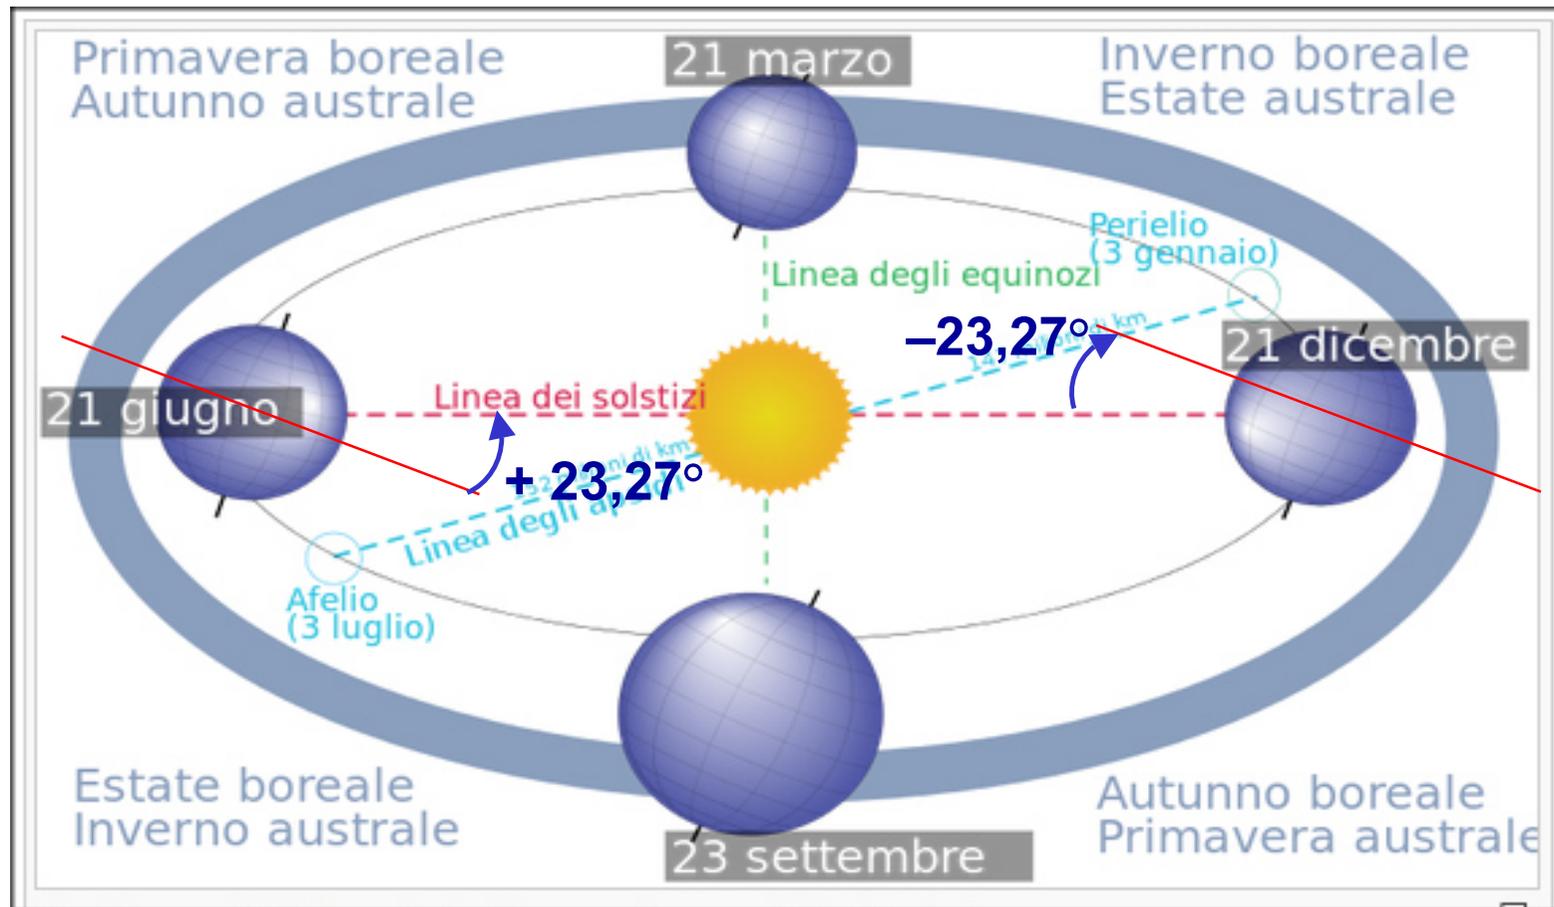

13 SEPTEMBER 2016 to 1-1-2017 ONLY 86° REVOLUTION

Here follows all the remaining steps to 21-7-2017 revealed by the 1st August 2012 CROP, during the “new planet alignment” due to the Second Sun HIGH FORCE of attraction.

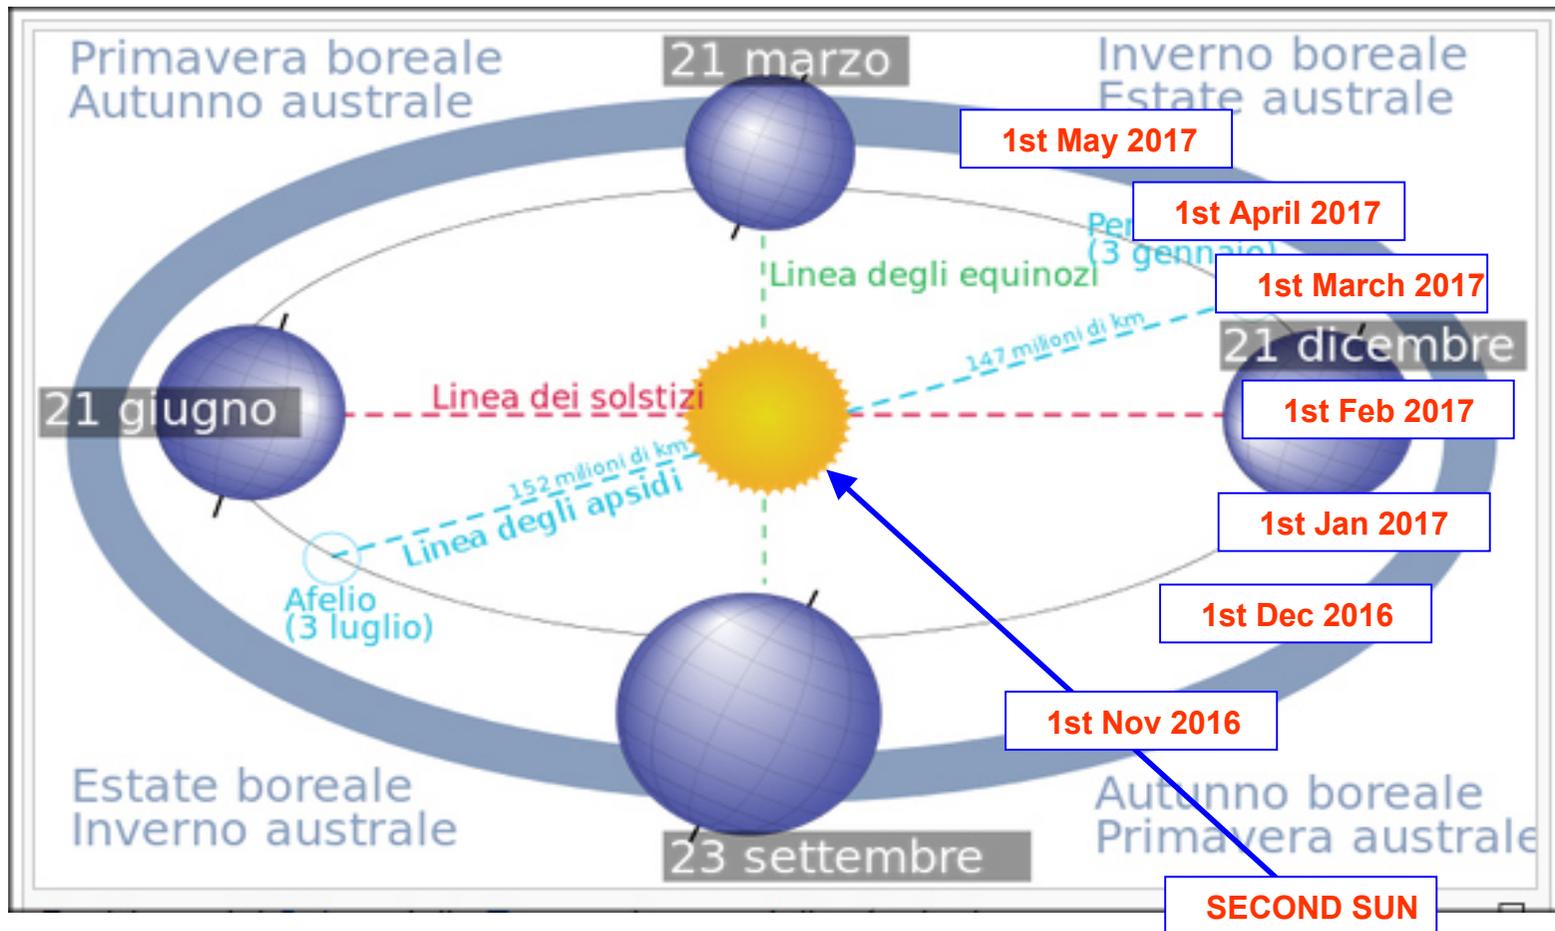

THE REVOLUTION SPEED is SLOWING DOWN starting from 13-9-2016
The NORMAL angular Earth speed should be 0,986 degrees per day (360°/365days)

initial date	period days	final date	revolution degrees	revolution degrees/day	total degrees since 13-9-2016

On the **NORTH EMISPHERE** the **APPARENT AXIS** inclination from June 21st to December 21st pass from **+ 23,27°** (start of summer) to **-23,27°** (start of winter)

The different position on the orbit sets a **NEW** apparent axis inclination toward the Sun, that will completely impact the **FALL**, the **WINTER** and the **2017 SPRING**

The different position on the orbit sets a NEW apparent axis inclination toward the Sun in respect to the seasons, that will completely impact the FALL, the WINTER and the SPRING

How to read the table - as an example:

On 1st February the real position of the Earth will be as to be on Dec 20th. So this will be our beginning of winter, The APPARENT AXIS INCLINATION will be out of $-10,7^\circ$

but.... Things won't be so simple.

On the 1st december the $+3,4^\circ$ difference will give us a warmer december than usual as to be in mid November, while at the beginning of March ($-19,87^\circ$) the winter will still be there. Mid April will get us as on the first 10th of "normal" December, then immediately after Summer temperatures will explode followed by the GREAT HEAT EXPLOSION never had (13-5-2017 and further on. See previous video)

The different position on the EARTH REVOLUTION orbit seen from the TOP ecliptic plane 1.11.2016 will be fully influenced by the Second Sun Arrival direction
(13-10-2016 Jupiter, Saturn and Uranus positions)

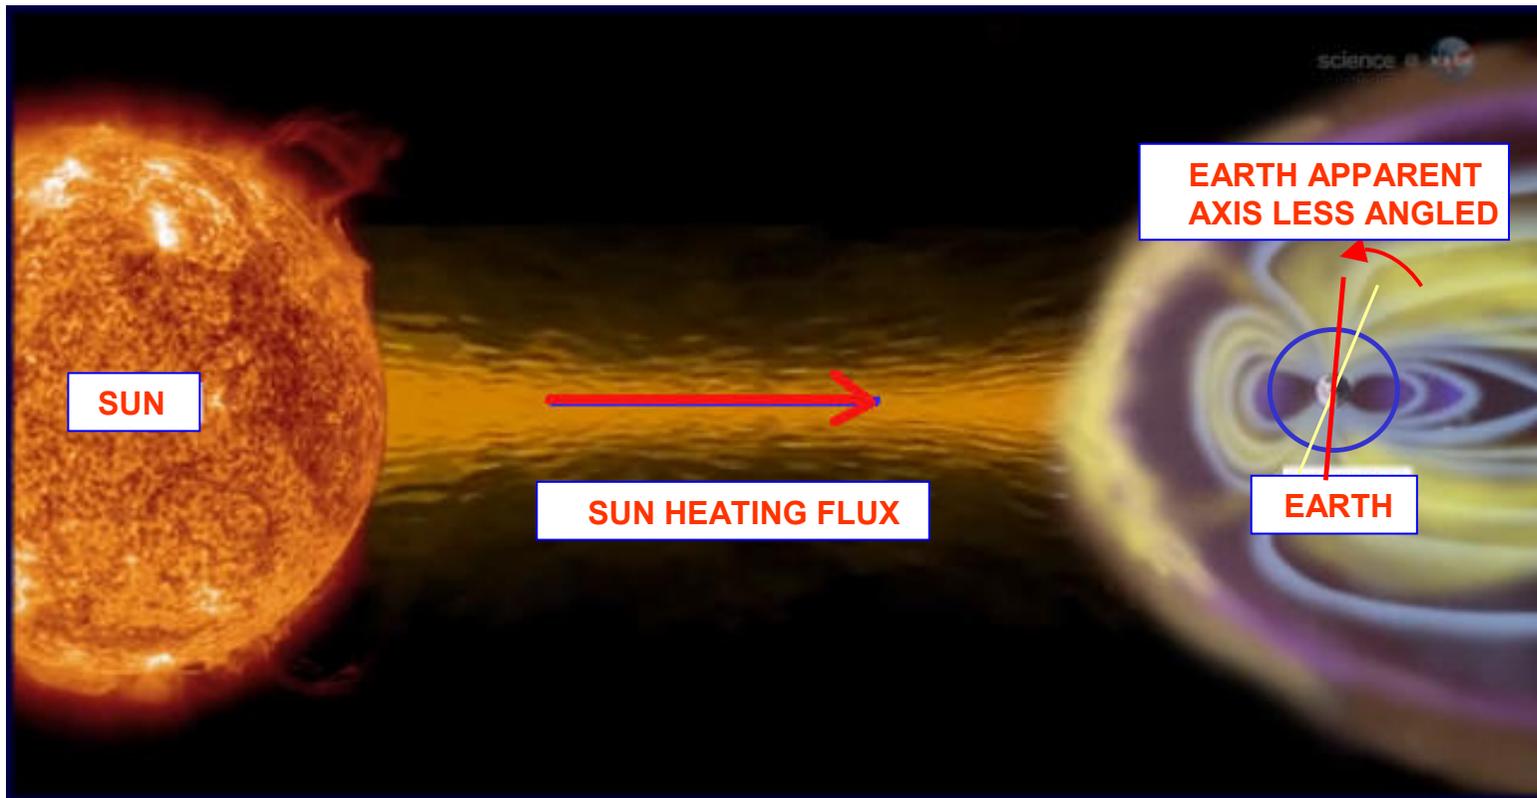

So it is correct: The earth will continue to move from its axis, without mankind's knowledge.

No one will be measuring the Earth AXIS tilting from the ECLIPTIC PLANE – this will come later on April 16, when everyone will acknowledge the great disaster, in the meantime the APPARENT EARTH AXIS will change without anyone noticing it, because the movement is related to the EARTH REVOLUTION SLOW DOWN.

To be aware of this we should be looking to the temperatures of the various seasons that will completely change in few months time. But at that time, we will be lost. Better be aware NOW, and a good example we had in October 2015 (the Second Sun was more far and Earth less involved), where in BRAZIL / ARGENTINA SPRING TIME, the temperatures went completely UP, higher than in their Summer time, facing big troubles.

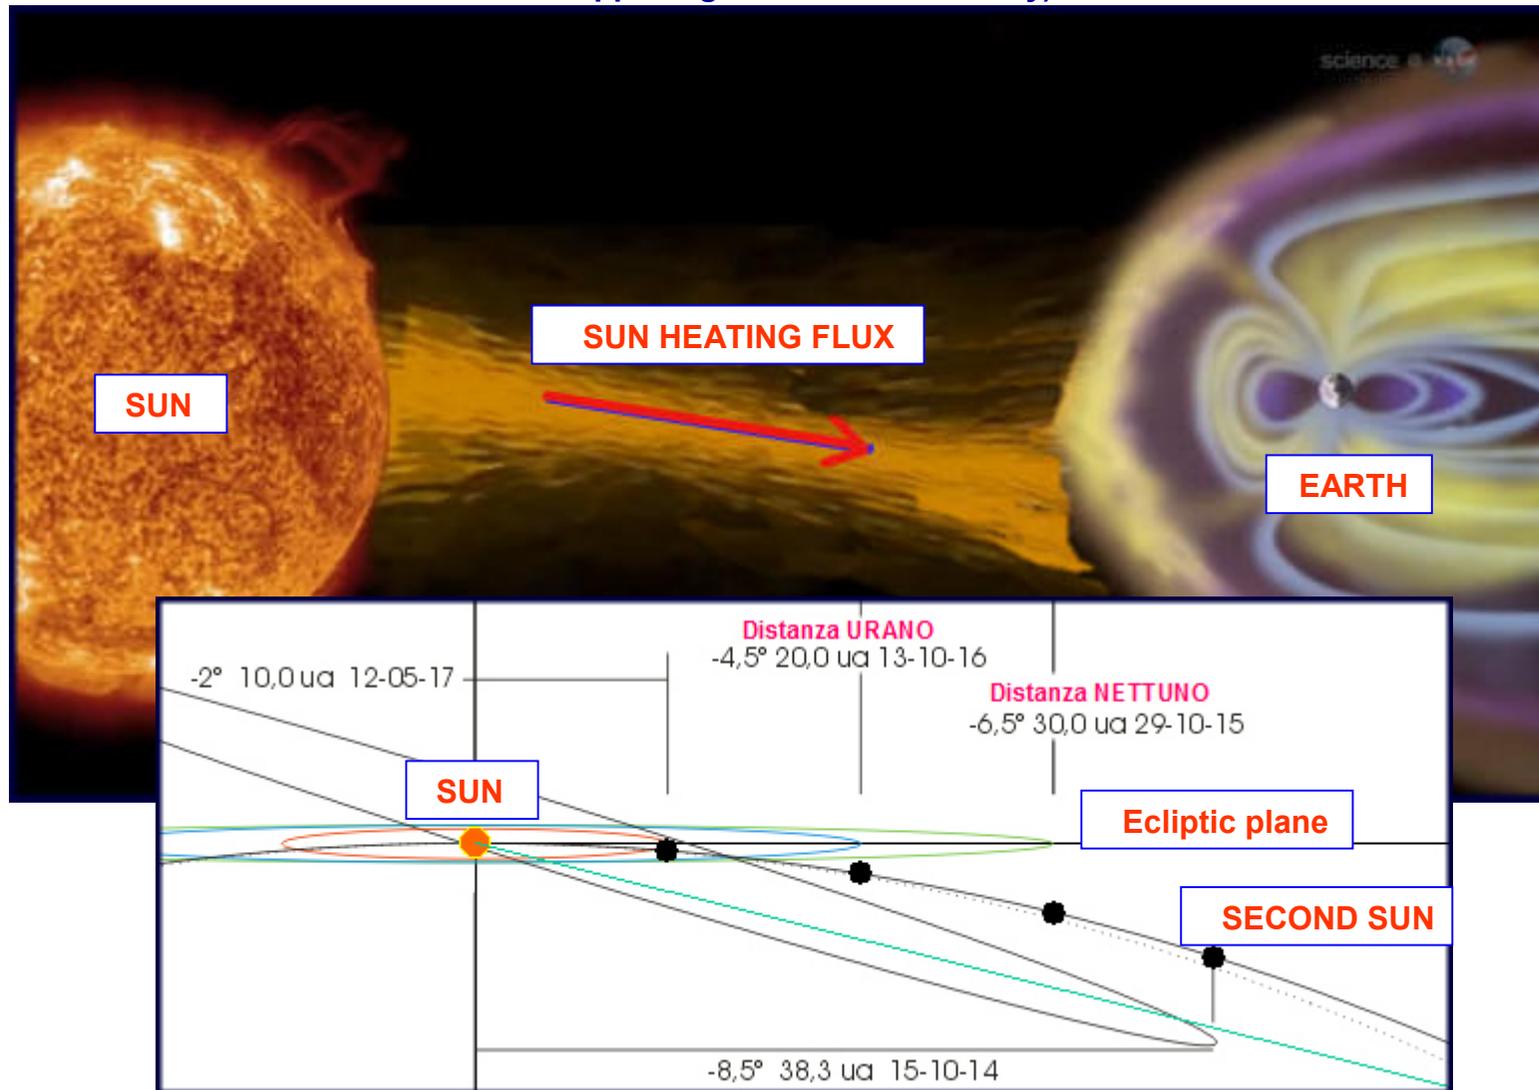

Everyone of you can easily imagine some happenings without be a weather scientist.

**The SUN FLUX is HIGHER when Earth is in the SEPTEMBER
OCTOBER / NOVEMBER / DECEMBER position
North Emisphere more WARM than usual**

Moreover this should diminish the temperatures on the Australian Emisphere, BUT this is not the case, because

The SUN FLUX is deviated by the SECOND SUN coming from SOUTH of the Ecliptic plane. Roughly $4,5^\circ$ at 13-10-2016 and 2° at 13-5-2017 (computing of data and elliptical Second Sun orbit presumed from some CROP circle suggestions. Data seems to be correct by looking to the Earth global temperatures of last year. The Earth happenings confirms the theory)

These are my thinking for the BOREAL EMISPHERE 45° NORTH :

SEPTEMBER HOT DURING MIDDLE DAY TIME – WARM in the MORNING

OCTOBER still high temperatures DURING MIDDLE DAY TIME – WARM in the MORNING – Night becomes always a bit colder than september

NOVEMBER WARM DURING MIDDLE DAY TIME – WARM in the MORNING – Night becomes always a bit colder than October

DECEMBER a WARMEST situation than usual during day + cold nighths, not too cold.

JANUARY temperatures as ENDING FALL TIME

FEBRUARY cold as BEGINNING WINTER TIME

MARCH cold as WINTER TIME

APRIL cold as WINTER TIME till 22nd April Then let's' PRAY

The temperatures will explode in 20 days time as NEVER by the **BIG PULL**. We will directly pass from FULL winter to full Summer, plus a further HOTTER SUMMER never been, and the time will start to diminish (see 2017 calendar and previous videos)

MATTHEW 24, [21] for at that time there will be great tribulation, such as has not been since the beginning of the world until now, nor ever will be. [22] And if those days had not been shortened, no one would be saved; but for the sake of the elect they will be shortened.

Stormy winds ever seen in quiet city, will demolish houses in a second. September 10, 2006 [from Ferreira] prophecies Brazil

Just 2 examples where science remains shocked 'cause deemed impossible in places being ravaged by cyclones and / or hurricanes. Cities and tranquil islands that never have seen any devastation. Also predicted by the Virgin Mary in Anguera

SOCOTRA (YEMEN). 2 hurricanes in 7 days. Science says: **There? it is IMPOSSIBLE.**

11/01/2015 - Hurricane Chapala, intensity between 4 and 5, reaches the coast of Yemen and strikes with a crazy violence on the island of Socotra.

08/11/2015 The Megh hurricane strikes Yemeni island of Socotra with heavy rains and winds of over 200km / h. Situation very heavy on the legendary island of Socotra Yemen, already struck last week by Hurricane Chapala and today "sunk" by Megh.

Message from Anguera 2,724 - 24/08/2006 Many regions inhabited today will become deserted. Where Socotra? Here is the painful question that will the men.

DOLORES (URUGUAY) 04/16/2016 devastated by a hurricane. Science says: **There? it is IMPOSSIBLE.** Tornado crash in Uruguay, devastated the city of Dolores "It 'something never seen before, a relatively rare and unusual phenomenon for this country," reports Besozzi, which then concludes: "houses, buildings, cars, everything went destroyed. Unfortunately there are also victims, seem pictures from a movie, but unfortunately it is not fiction, it's all true. "

Message from Anguera 3362-21 August 2010 - Dear children, Dolores will live in anguish on seeing the devastation in Belo Monte (Montevideo). The earth is filled with wickedness, and men walk like blind spiritually.

WE ARE ONLY THE BEGINNING OF THE END

If you're still thinking CROP circles are made by humans, well, these guys had had a lot of thinking in making all this stuff working together drawing them down with so many years difference asking also to the Holy Mother what to say, with all the intriguing astronomical matters and messages, awaiting on someone to put them together giving a sense instead of making crosswords. But if you think they are from extraterrestrials aliens, then, please bring them here, we will be having a cocktail party together before the end with a big hit on their shoulders as Bruce Willis USA hero this time won't be able to save you again. That was a fiction, didn't you recognize that?
